## Live our values every day.

## Partners in Motion Control

## Mission:

We provide expert, professional-grade solutions and products, building the trust of customers by solving their high-value problems.

Vision:
To become the leading industrial technology company in safe and productive motion control.

## Our Values - Raising expectations

Connect safety to everything you do.
Take personal responsibility. Care for our people. Build products that everyone can trust.

Be easy to do business with.
Focus on the customer. Listen. Simplify.

Deliver on your commitments.
Aim for greatness. Do your best. Hold yourself accountable.
Think differently.
Be proactive with new ideas. Ask questions. Be part of the solution.

## Win as a team.

Work together. Respect each other. Celebrate success.

## Act with integrity.

Do the right thing. Extend trust. Appreciate differences.

## QUALITY POLICY STATEMENT

Columbus McKinnon Corporation is committed to provide a standard of service that fully meets our distributors needs. We recognise the importance of adopting and maintaining an internationally recognised standard of quality assurance. Using ISO 9001 accreditation as the base on which we build sustained improvement for all of our activities.

Resources have been provided to ensure that all contractual and statutory needs are met and that all staff are trained and aware of the CMCO philosophy of improvement through commitment, assessment, and re-evaluation.

A copy of CMCO UK's Quality Policy is available on request.

Lifting Equipment Engineers Association

## DISTRIBUTOR NETWORK

## 'Distributor sales policy'

As a distributor of Columbus McKinnon Corporation (CMCO) branded hoists and lifting equipment, you have a great opportunity to add further income and profit to your bottom line, from dealing with one of the world's leading and most respected suppliers. With a rich 146-year tradition, the company focuses on commercial and industrial applications that require the highest level of safety and quality provided by its superior design and know-how.

We operate a distributor only sales policy here, on mainland UK - your only competitors are our competitors, and all enquiries go straight to our distributors. So the way is clear for you to make the most from the products we have to offer.

CMCO includes brands with a reputation for performance and quality engineering going back more than a century:

- Yale hoists and lifting equipment - the number one choice in the UK and a brand with instant global recognition.
- Pfaff-silberblau - German engineering quality.
- Camlok - still the market leader in clamps and accessories.
- Steerman - the first choice for professional load movers.
- CM - This American legend is a workhorse trusted for generations.

From our UK facilities in Chester and Belfast we back our distributors with a total support package of marketing, promotion and training materials, parts, service and technical support. Everything you need and expect from a global force in the industry to help you make more profit.

You can market CMCO products wherever you wish, to any potential user - in sectors such as warehousing, manufacturing, metal stockholding, distribution, construction, ports and docks, airports, railway engineering, electrical and electronics, entertainment, sports - even the theatre.

In today's tough economic climate it makes sense to explore every avenue to boost turnover and profits, and if you're not a CMCO distributor already, we'd be happy to visit you and discuss how becoming a distributor could help you achieve your commercial ambitions.

## "Goods Return Policy"

We would like to draw your attention to Columbus McKinnon Corporation Limited's policy on the returning of goods, either when:-
a.) Incorrect goods ordered by distributor or end user.
b.) Goods despatched but later cancelled or unwanted by distributor or end user.

On either of the above occasions, unless otherwise confirmed in writing to the contrary, the Company will levy a standard handling charge. This handling charge is to cover administration costs, Q.A. inspection of returned goods, and operational expenses of goods to be returned to stores. The handling charge is $20 \%$ on 'standard manual products' on the net value minus any carriage costs. All 'non standard' configured items, electric chain hoists, spare parts, or any item that has been manufactured, or ordered to a customers specific requirement CANNOT be returned for credit. Any intention to return goods for credit should be notified to the company in writing within 14 working days. Please see below for the return of goods authorisation.

## "Returns Authorisation"

Before any goods are returned the distributor MUST contact a member of the sales team to gain a valid Returns Number. Any goods that arrive without a Returns Number will not be accepted for credit and will be refused by Goods Inwards.

Upon the accepted return of the goods, each item will be inspected and if, after inspection, it is noted that any rectification work is required before it can be returned to general stock the company will charge the distributor for the rectification. This work will be done at our standard repair charge out rate and we will inform the distributor of the faults or damage noted and the work required to re-instate the item to a saleable condition.

All returned goods are to be returned by the distributor at their cost with either a copy of the Returns Number or the Returns Number clearly marked on the goods. Please ensure you return the goods to the correct site. All electric chain hoists, pallet trucks, clamps, or manual hoisting equipment should be returned to our Chester location. If you are in any doubt please confirm with a member of our sales team prior to sending any goods back.

The company reserves the right to reject outright any returns that are not packed in the original packaging or suitable replacement packaging.

## "Warranty Claims"

All equipment complies with the high standards of quality established by the Company both in respect of materials and workmanship and as the sole and exclusive remedy in discharge of this warranty the Company undertakes to replace free of charge within 360 days from date of despatch from its works any components of its manufacture, which are proved to the satisfaction of the Company (whose decision shall be final and binding) to be defective in materials and workmanship provided notice in writing to the Company is given within 10 days of the defect occurring and provided the component which is the subject of the complaint, if the Company so requests returned pre-paid to the Company's works. In the case of defective components or parts not of the Company's manufacture the Company's liability shall be limited to such adjustment or allowance as the manufacturer there of shall make.

The Company shall not accept responsibility for such work done or expense incurred by the buyer in connection with any repair or replacement unless the Company's prior written authorisation has been obtained. This warranty is in lieu of and excludes all other conditions and warranties whatsoever whether expressed or implied and whether under common law, statute law or otherwise and apart from the aforesaid the Company hereby expressly excludes all liability for any loss or damage whatsoever arising and howsoever caused. The buyer warrants that it will pass on, to all third parties to whom it may supply the goods, all information as to the correct use, maintenance, and safe handling of the goods, as may have been passed onto the buyer by the Company.

## CAMLOK CLAMP INSPECTION \& REPAIRS

Columbus McKinnon Corporation offer a full inspection and repair service for Camlok Lifting Clamps. Prior to any clamp(s) being returned however, our authorised distributor must contact CMCO to arrange the correct paperwork.

## - Warranty/Inspection/repair

Prior to returning any item for warranty, inspection, or repair, you must contact the sales team to request a Returns Goods Authorisation Form (RGA).

When the unit is returned the item MUST be labelled, and/or have the relevant paperwork. Please note that any unit returned to us without an RGA number or correct paperwork will not be inspected or looked at.

There is a minimum charge of $£ 90$ net applicable when inspecting a standard clamp. This charge applies whether the clamps are repaired or scrapped and an order number will need to be provided prior to the return. Special clamp inspection costs will be advised accordingly. The standard repair cost for a clamp is $£ 90$ net plus the cost of any spares used.

Clear instructions will be necessary if units are to be scrapped, or to be returned if a repair is not carried out. Return carriage costs will be applicable. Please note that CMCO will dispose of any clamp not repaired, or requested for return, after 6 weeks.

## TRAINING COURSES

## Are your staff certified?

As part of Columbus McKinnon Corporation's (CMCO) distributor support programme, the company offers a variety of training courses. Our trainers are leaders in their field and they provide courses designed to help employers and users operate hoists, clamps and other equipment safely and efficiently.

The curriculum includes subjects such as hoist maintenance and fault finding, inspection and safe use of height safety equipment and where and how to use plate lifting clamps. Experienced CMCO training staff have the unrivalled support and expertise of one of the world's leading designers and manufacturers of lifting equipment, ensuring practical and thorough training in line with current legislation.

## Examples of training courses available:

- Lodestar training schools
- Safe use of lifting clamps
- Height safety equipment product awareness
- Inspection \& repair of manual chain hoists
- Repair \& maintenance of electric chain hoists

## MARKETING SUPPORT

Continuing our commitment to our distribution partners, we have developed many product / industry specific brochures, product charts, safety posters, flyers, interactive CD's, DVD's, videos, and websites.

Please contact our marketing department for all literature, posters, images, videos, photographs, web site advice, CDs, fonts, or logos.

We are happy to release the copyright of all our images for use on distributors web sites or in their own brochures providing that prior written consent is obtained from Columbus McKinnon Corporation Limited.

## COLUMBUS McKINNON Corporation

## Yale HOISTS

## Yale Industrial Products

Instantly recognisable, the Yale name is synonymous with quality hoisting equipment and has been since 1877 when Linus Yale, Jr. produced the first spur geared hand chain hoist with the Weston Screw Brake.

Now, 146 years on, we still lead the industry with new and innovative products, like the revolutionary Yalelift $360^{\circ}$ hand chain hoist and the new YaleERGO360 UT ratchet lever hoist.

Our reputation has been built in close association with our distribution network. Supplying industry with a range of lifting equipment which is second to none.
"Britain's No. 1 Name for Lifting!"

## © STEERMAN ${ }^{\circ}$

## LOAD MOVING SYSTEMS

## Steerman Load Moving Systems

A worldwide supplier of load moving equipment, with outlets throughout Europe, Africa, Asia and North America,
Steerman is the natural choice of the professional load movers.

These systems have been developed over a number of years to ensure total ease of operation.

Steerman load moving skates comprise of a steerable front section and a pair of adjustable rear trolleys. These innovative systems are available in capacities ranging from 10 to 60 tonne and can easily be stripped down to component parts for easy transportation.
"Moving loads the professional way!"

Pfaff-silberblau
Established in 1867, Pfaff-silberblau is the leading manufacturer of electric and manual winches in Europe. Available in capacities from 125 kg up to 7500 kg and with over 1000 variations the Pfaff range of winches is second to none.

Pfaff also offer a comprehensive range of manual and electric hand pallet trucks, pedestrian manual and powered stacker trucks, and manual and electric scissor tables.
"Movability is a question of creative technology"

## CM Industrial Products

With more than a century of experience providing products and solutions for industrial manufacturing and construction, the CM brand has developed a loyal following with users around the globe.

The Lodestar electric chain hoist is requested by name due to it's reputation for durability and long life. The CM name represents a legacy of expertise in the market.
"A workhorse trusted for generations!"

## Camlok

Camlok Lifting Clamps
With over 60 years experience in design, manufacture and supply of below the hook lifting clamps and grabs, the name Camlok is known and trusted throughout the world.

As the UK's largest manufacturer of clamps and grabs, Camlok pride themselves on their extensive standard product range and their ability to offer solutions to most lifting applications.

Camlok's top priority has always been safety, and as such offer professional training sessions for authorised distributors and their customers.
"Lifting safety to new heights!"

## Yale EREO 360 ratchet lever hoist

## Designed for optimum efficiency and safety

Redefining lever-operated hoists, the YaleERGO features the evolutionary crank handle that allows for efficient operation in both lifting and pulling applications. Ergonomically designed for increased safety, the patent pending YaleERGO lets the operator work up to 12 times faster and with as much as $30 \%$ less effort than with conventional ratchet lever tools.

- Crank handle made of durable polyamide with a heavy-duty steel core for rugged use.
- Effective operation from any angle with a handle that folds down and locks into position on either side of the lever.
- The design keeps the operator's body aligned with the load chain, reducing the risk of the twist effect - when a hoist twists around the chain. No need to use a second hand to stabilize the hoist.
- Operator can securely grip the grooved, no-slip handle.
- Optional Overload Protection device £139.10

## Wtility version

Special applications such as overhead line construction require specialist lifting equipment.

In accordance with EN 1808 - Safety requirements for suspended access equipment, 8.9.2, the new YaleERGO UT is supplied fitted with an automatically acting safety device, which offers even more security when used in overhead line construction or similar areas.

The innovative safety device, patent-pending, which prevents a sudden load drop or run through works when a certain speed is exceeded during use as well as during inactive phases especially when the device has been left under tension for long periods of time.

The system safely absorbs the load after only $25-50 \mathrm{~mm}$ of chain movement preventing the creation of larger dynamic forces which could cause further damage.

Another highlight is the possibility of being able to lift at any time - even after the safety device has been triggered. By simply turning the hand lever a full turn in the lift direction, the safety device is automatically unlocked. It can then be returned to its original position at the push of a button. This means that the device can be removed and checked at any time with minimal effort and/or downtime.

## Yale UNOplus - Series A ratchet lever hoisi

## Yale's best selling lever hoist just got a bit better!

The NEW and improved Yale UNOplus-Series A is the upgraded version of the best selling UNOplus. It is a versatile ratchet lever hoist designed for pulling, lifting, and lashing of loads. Its features include a compact design, robust stamped steel construction, and a favourable price / efficiency ratio.

The new unit is even lighter in weight and comes complete with a free chaining device as standard that serves to quickly attach the load or to pull the chain through the hoist in both directions.

The UNOplus-Series A is available as a 'Standard' lever hoist, an ATEX unit, or a UTILITY version specifically for overhead line construction.

## Weility version

Special applications such as overhead line construction require specialist lifting equipment.
In accordance with EN 1808 - Safety requirements for suspended access equipment, 8.9.2, the new UNOplus-Series A UT is supplied fitted with an automatically acting safety device, which offers even more security when used in overhead line construction or similar areas.

The automatic locking safety device prevents a sudden drop (patent pending). It guarantees permanent monitoring and is active during operation as well as during inactive moments without the user having to activate it. In case of emergency, i.e. after failure of the load pressure brake and consequently exceeding the specified speed, the safety gear will automatically activate. It safely absorbs the load, preventing the creation of larger dynamic forces which could cause further damage.

## HANDY 'smallest ratchet lever hoists

## The smallest and lightest ratchet lever hoist in the Yale range

Capacities: 250-500kg
Due to the multitude of application possibilities, e.g. industry, trade, and service, this ratchet lever hoist really is indispensable. The extremely low tare weight and very compact design makes the hoist easy to use, even in very confined working conditions.

## Features include:

- Enclosed design protects internal parts from contamination.
- The short handlever is fitted with an ergonomic rubber grip.
- All parts of the disc type load brake are manufactured from high quality materials and are corrosion protected.
- Standard free chaining device to quickly attach the load or to pull the chain through the hoist in both directions.
- Alloyed steel link chain with zinc-plated resp. yellow chromated finish, in accordance with national and international standards and regulations.
- Drop forged hooks with robust safety latches.

## YaleMIN/360 hand chain hoists

## INTRODUCING OUR NEW

## Yale $/ 1 / / N / 360$

## Capacities 250 and 500kg

The new YaleMINI360 is made of die-cast aluminium, is very light weight, and easy to carry. It is the smallest of all Yale hand chain hoists and it is compact in design with a $360^{\circ}$ rotating hand chain wheel cover that ensures a high level of safety, as it is possible to work outside of the danger zone.

Due to it's size, the YaleMINI360 fits perfectly into every tool box and has countless application possibilities including assembly work, repair shops, or for use in conjunction with light weight aluminium gantries. They can also be used outdoors or in tough environments.

## Features and benefits include:

- Compact design, light weight, easy to carry
- Made of aluminium alloy, safe and reliable
- Double pawl brake system providing increased safety
- High mechanical transmission efficiency and durability
- Galvanized load chain and hand chain with bright zinc finish
- Rotating hand chain cover allows hand chain to be pulled throughout $360^{\circ}$

## Yalelift $360^{\circ}$ MK III намо снаाм ноіsтs

## Revolutionary hand chain hoist

A hand chain hoist which opens up huge new opportunities: With our innovative design things are really beginning to move. The Yalelift $360^{\circ}$ opens up a new world of safety for the operator. The range of applications as well as the operating conditions have been changed by a revolutionary hand chain cover.

The key to this innovation is our revolutionary $360^{\circ}$ rotating hand chain cover, which allows operation of the hand chain from virtually any position, even in extremely confined areas. The Yalelift $360^{\circ}$ can be operated at the side of the load or from any other position including horizontal pulling. The plane between top and bottom hook must always be in a straight line. A deration of the W.L.L. may apply.
*SUITABLE FOR FLEETING. For further details please contact the sales office.
More flexibility gives greater safety - operators can now work outside of the immediate danger zone reducing the risk of operator injury.
Safety under control: The Yalelift $360^{\circ}$ for heavy industrial applications will revolutionise every operation. By means of the $360^{\circ}$ rotating hand chain cover, the user can operate the hoist from all directions and is no longer directly within the danger zone as before.

You choose: The Yalelift $360^{\circ}$ can be operated safely and efficiently from all positions, even from the side of the load. This means more safety and greater flexibility of the working position.

Work from above: The flexibility of the Yalelift $360^{\circ}$ allows the operator to work from directly above the load. The advantage of this application is you can have a long lift whilst using a relatively short hand chain. The revolutionary chain guide ensures a precise and smooth chain operation at all times.

ATEX
Protection classification
See pages 18 \& 19
*The standard unit is supplied with zinc plated load chain and zinc plated hand chain.
**The corrosion resistant unit is supplied with stainless steel hand chain and zinc plated load chain. If you require stainless steel load chain please see page 17.

spare parts for the Yalelift hand chain hoists are on pages 150-155

## Yale lift $360^{\circ}$ MK III tow headroom' trolley hoists

## Hand chain hoist with integrated, low headroom, push or geared travel trolley

Capacities: 500-20000kg

The combination of the Yalelift $360^{\circ}$ with a low headroom manual trolley provides even more flexibility in the application of the Yalelift $360^{\circ}$

## Features include:

- All units of this series up to a capacity of 3000 kg are provided with single chain fall and the min. headroom (Dim. A) has been further reduced. Ideal for applications with low ceilings and limited headroom.
- The proven and almost stepless adjustment system allows quick and easy assembly of the trolley.
Trolleys up to 5000kg are offered for two beam ranges. Range A for a flange width up to 180 mm is standard and covers approx. $80 \%$ of all requirements. Conversion to range B for beam width up to 300 mm can be easily accomplished.
- The trolley wheels are designed for a max. beam profile incline of 14 \% (DIN 1025 part 1), excellent rolling features are guaranteed by prelubricated, encapsulated ball bearings.
- Anti-drop and anti-tilt devices as standard.

## Options:

ATEX
Protection classification
See pages 18 \& 19

- Overload prevention device

Chain container.
Rubber buffers (shown in photograph on the right available as optional extra).
Explosion proof version (see page 18-19).
Beam locking device to secure the unloaded trolley in a fixed position on the beam (park position e.g. on ships). Available up to a capacity of 5000 kg .

- Ultra low headroom version (YLLHP/G) available upon request.

## CORROSION RESISTANT hoists with Stainiess chails

## Increased life expectancy

All models of the Yalelift $360^{\circ}$ programme can be supplied with corrosion resistant features and be fitted with stainless steel load and hand chain.

Corrosion starts on the surface of components due to reaction of environmental influences. This affects the mechanical properties of the components, e.g. breakingload and total ultimate elongation.

Many components are supplied in black (unmachined), bright (machined) or painted condition. This offers certain protection but after only a short period of time corrosion can begin. With the application of a protective coating, the development of corrosion can be reduced and delayed, thus extending the service life of the treated components.

Units are corrosion resistant using the Delta Protekt KL 100 process, including the bottom hooks and are all fitted with stainless steel load and hand chain.

## Applications

Completely corrosion resistant units with stainless steel hand and load chains should be used in all conditions with increased requirements towards corrosion protection.

Typical applications are in food processing (e.g. dairy, abattoir, etc.), chemical ndustries (e.g. paper, dye industries), farming and sewage treatment.

## ATEX Ex> HOISTS AND TROLLEYS

## Why explosion protection?

Explosion protection for electrical and mechanical machinery is an important precautionary measure to ensure the safety of persons and all kinds of production, storage and distribution systems, when explosive mixtures of combustible gases, dusts and air may occur.

## What does explosion protection achieve?

Explosion protection can mean to generally prevent the ignition of an explosive mixture. Explosion protection can also be achieved by eliminating potential ignition sources in advance, e.g. high temperatures and sparking.

In many trades and industries, combustible gases, vapours and dusts are handled which have the potential to cause explosions.

## Examples of explosion hazards:

- Chemical industry
- Waste disposal sites
- Energy production companies
- Waste management companies
- Gas suppliers
- Metal processing companies
- Wood-processing companies
- Paint shops
- Agriculture
- Food and feed-stuffs industry
- Pharmaceutical industry
- Refineries
- Recycling companies

For full technical specification and application details please contact the sales team for the NEW comprehensive ATEX product brochure.

All of Yale's ATEX hoists meet the following standards: EN1127-1:1997; EN13463-1:2001; EN13463-5:2003, and are supplied complete with the relevant ATEX approval documentation.

## Levels of protection:

Columbus McKinnon offer three levels of protection - BASIC, MEDIUM, and HIGH.

Under directive 94/9/EC, equipment for areas with an explosion hazard are assigned to groups, categories and temperature classes. This is necessary as the requirements for equipment need not be the same for every application and for every hazard classification.

## BASIC

## VLRP / VLRG Swivel truck trouer hoists

# Swivel truck low headroom hoist with integrated push or geared trolley 

## Capacities: 250-6000kg

The hand chain hoist series VLR with integrated manual trolley drive features extremely low headroom capabilities and provides optimal usage of the available storage space in confined areas.

Hand wheel and gear case are positioned outside the reach of the bottom flange, thus allowing the bottom block to be raised almost to the underside of the beam. The swivel truck feature of the trolley suspension enables travelling on extremely tight radius curves.

## Features include:

- All-steel construction with zinc-plated load and hand chains.
- Swivel trolley designed for runways with extremely narrow radius
- All units are built to order for a predetermined beam dimension.

They cannot be adjusted retrospectively to other beams.

- Anti-drop and anti-tilt devices as standard.

## Options:

- Overload protection, chain containers and buffers Beam profile and dimensions, as well as the radius of he curve, must always be specified at the time of order.

## INTRODUCING OUR NEW STEEL

## 

\& SCANME
Pulling force: 500-3200 daN

The portable Yaletrac ST steel cable puller is a versatile tool for pulling, lifting, lowering, tensioning and securing loads over long distances. It has been specially designed for applications in industry, building construction, civil engineering, power line construction, ship building and oil refineries etc. The Yaletrac ST cable puller is almost service free - easy to use and safe.

Cable pullers model Yaletrac ST feature a housing of dimensionally stable deep-drawn steel plates ensuring a compact and robust design. The hand operating forces have been noticeably optimised for the user by the application of axial ball bearings.

## Features and benefits include:

- Stable upright positioning of the unit due to the combination of handle and foot.
- Space-saving telescopic hand lever that can be safely attached to the unit by means of a hook and-pile fastener. Short handle lever for Y05 ST not telescopic.
- Overload protection is provided by a shear pin. Spare shear pins are conveniently located in the carrying handle. A broken pin can be replaced without removing the load.
- Yaletrac ST uses a special flexible rope. It has six strands with a steel core and is identified by an orange strand. The rope is tapered at one end for easy threading and is fitted with an eye sling hook with safety latch on the other end.
- The parallel arrangement of the clamping system protects the rope by distributing the clamping forces evenly. A long rope advance per each lever stroke increases the working speed.
- Increased service life of the unit due to the use of rubber sleeves which prevent dirt and dust from penetrating into the mechanical equipment of the unit.
- Positioning of the forward and reversing levers in tandem provides a slim design and ensures optimal power transfer.
- A lever disengages the rope clamp system allowing easy and smooth installation of the rope.
- The large opening in the top of the unit allows easy cleaning: simply flush the unit with water and apply motor oil for lubrication and the Yaletrac ST is again ready for use.

Every Yaletrac ${ }^{\circledR}$ cable puller is factory tested with overload and is supplied with an EC Declaration of Conformity, showing the serial number and an operating instruction manual.

## Yaletrac ${ }^{\circledR}$ 'ALUMINIUM' CABIE PULLERS

## THE ORIGINAL ALUMINIUM

 YaletracPulling force: 800-3200 daN

The Yaletrac ${ }^{\circledR}$ range of portable cable pullers provide a versatile tool for pulling, lifting, lowering, tensioning, and securing loads over long distances. They are easy and safe to use and are almost service free.

They are light weight, compact, high strength aluminium alloy housing with a large flat bottom surface for increased stability in horizontal as well as vertical working positions.

Specifically designed for applications within industry, building construction, civil engineering, ship building, power line construction, and oil refineries, etc. Yale also manufacture an 'all steel' unit designed specifically for the mining industry.

## Features and benefits include:

- Forward and reversing levers, operating in tandem provide slim design and assure power transfer along the centre line.
- A lever disengages the rope clamp system allowing easy and smooth installation / removal of the wire rope.
- Overload protection is provided by a shear pin in the forward operating lever. Spare shear pins are conveniently located in the carrying handle or operating lever.
- Large opening in the top of the units allows easy cleaning: simply flush the unit with a bucket of water, apply motor oil for lubrication and the Yaletrac ${ }^{\circledR}$ is ready for use again.
- The Yaletrac ${ }^{\circledR}$ cable pullers use a special flexible wire rope. It has six strands with a steel core. The rope is tapered at one end for easy threading and fitted with an eye sling hook with safety latch on the other end.

Every Yaletrac ${ }^{\circledR}$ cable puller is factory tested with overload and is supplied with an EC Declaration of Conformity, showing the serial number and an operating instruction manual.

## Beam clamp model YC <br> Working load limit (WLL) 1000-10000kg

The YC beam clamp provides a quick and versatile rigging point for hoisting equipment, pulley blocks or loads and comes complete with a locking device. The unit offers flexible applications, due to the wide adjustment range. The central threaded spindle allows easy attachment and a safe and secure grip to the beam flange.

NB. THIS MODEL MUST NOT BE USED FOR LIFTING. IT IS ONLY TO BE USED AS A SUSPENSION POINT.

The SC92 beam clamp provides a quick and versatile rigging point for hoisting equipment, pulley blocks or loads. The unit offers flexible applications due to the wide adjustment range. The shackle suspension allows easy attachment of lifting devices. The clamp offers a safe and secure grip to the beam flange.

NB. THIS MODEL MUST NOT BE USED FOR LIFTING. IT IS A SUSPENSION POINT.

## HTP/G push and gear travel trollevs

## Push trolley model HTP Gear trolley model HTG

## Capacities: 500-50000kg

The trolley enables the exact positioning or easy traversing of large loads with either manual or powered hoisting equipment.

## Features include:

- It has excellent rolling features due to machined steel wheels mounted on prelubricated, encapsulated ball bearings.
- Adjustable to fit a wide range of beam widths and profiles (e.g. INP, IPE and IPB).
- Adjustments are made by rotating the clevis load bar which also ensures the centred positioning of the hoist in the clevis - no creeping to the left or the right.
- The trolley wheels are designed for a max. beam profile incline of $14 \%$ (DIN 1025 - part 1).
- Trolleys are in accordance with the UVV and machinery directives.

## Options:

- Rotating hand chain guide.
- Lock nuts.

## ETP Integral' travel trolley beam clamps

## Trolley clamp model CTP

## Capacities: 1000-3000kg

The easy installation to any beam makes the CTP suitable for fixing to any hoists, pulleys and loads you wish to move.

It can be adjusted quickly to the beam width by turning the main spindle and safety is ensured by the special locking lever.

The spindle and snap-pin stops are galvanised to protect against corrosion.

NOTE: These trolleys are not designed for passenger elevation applications and must not be used for this purpose!

## BA bulb bar anchors

The BA bulb bar anchor has been designed for attachment to bulb profiles, often found in ship compartments and engine rooms, and provides a semi-permanent suspension point. The clamp can be quickly and easily attached via the screw mechanism.

The fabricated light weight design ensures a firm grip onto the bulb section. The unique large bow hook ring gives easy connection for all types of lifting machines.

| Model | WLL <br> $\mathrm{kg}^{\star}$ | Max. bulb <br> hp | Weight <br> $\mathrm{kg}^{*}$ | Price <br> $£^{\star}$ |

*Per clamp. - Please contact our sales team for full technical drawings.
NB. THIS MODEL MUST NOT BE USED FOR LIFTING. IT IS A SUSPENSION POINT.

## UTE-U ELectric travel trolleys

## Electric travel trolley VTE-U Capacities: 1000-5000kg

Specially recommended for loads over 1000 kgs , for transporting over long distances, and/or for frequent use. Suitable for almost all hoists with suspension hook, due to Yale's universal shackle connection.

Travel motor with worm gear transmission ensures smooth start and self braking - a separate motor brake is not required.

## Features include:

- Low voltage control 42 v
- Standard operating voltage 400 v 3 ph 50 Hz . (110v and 230 v 1 ph 50 Hz trollies are also available.
- Motors protected to IP 55 against dust and water jets. Push-button pendant control IP65.
- Compact, robust frame with low overall height.
- Wheels manufactured from fracture-proof steel. Smooth running due to machined surfaces and ball bearing mounting. Cambered wheel profile suitable for flat and inclined beam profiles.
- Anti-drop and anti tilt devices as standard.
- Easily adjustable to fit a wide range of beam widths and profiles via due to threaded load bars.
- Rubber buffers available as optional extra.
- Travel limit switches also available.

NOTE: These trolleys are not designed for passenger elevation applications and must not be used for this

supplied as standard with universal fitting
 purpose!

| $\checkmark$ | Chain container required: $\square$ Yes $\square$ No |

$\checkmark$ Weatherproof cover: a Yes aNo

## Environment

Is the hoist to be used or stored outside?
If the answer is yes, then consideration must be given to the level of protection provided. ie: a rain cover, or a 'dog kennel' cover to park the hoist under when not in use or a higher level of enclosure specification. Can the hoist be easily removed for storage when not in use?

Consideration given now to the environment/climatic conditions will save considerable down time and maintenance costs later.

## Power supply

Is there an adequate power supply available adjacent to the hoist location?
What is the distance between hoist and supply? In each case it is recommended that the supply cables and equipment are checked to ensure compatability and that the installation conforms to the current UK and European standards.

Photograph: A Yale CPS electric chain hoist left outside with no added protection.

## Hoist operation

How long is the hoist in operation? How many load cycles per hour? or hours per day is it in use? What distance is covered per lifting cycle?

If you have any doubts or questions regarding which electric hoist to purchase or the application you are using it in please ask a member of the CMCO sales team prior to purchasing.

# CPS ELEGTRIC GHAIN HOISTS [110v, 23Ov \& 400v] 

# One big little hoist. 

## It Keeps lifting and lifting.

The CPS electric chain hoist can lift loads up to 250 kg - yet weighs from only $\mathbf{1 2 k g}$.
With an M4 high duty rating, the rugged CPS electric chain hoist keeps lifting and lifting - up to 240 motor starts per hour. It's easy to install and maintain, making it ideal for maintenance, jib and light crane systems.

The CPS electric chain hoist is built to the highest standards (just like all Yale products) and offers unequalled levels of build quality and reliability. Our one year warranty, repair and full after-sales service will allow you to recommend this excellent product with confidence.

## Features and benefits include:

Easy installation and maintenance.
IP54 as standard.
48v Control voltage.
Overload protection device as standard.
10-pocket oblique-lay lift wheel for smooth
chain operation, constant chain speed and
reduced chain wear.

## CPV/F ELECTRIC CHAIN HOISTS [400v 3 Ph 50hzu

HIGH PERFORMANCE

Electric chain hoist, model CPV/F, with suspension lug, hook or integrated travel trolley

Capacities: 250-5000kg
The Yale electric chain hoist, model CPVF, combines modern design and technical innovation.

A robust construction makes the series a versatile tool for industrial applications. Upper and lower limit switches considerably extend the working life span of the slipping clutch, motor, and gearbox.

## Features include:

- Load sprocket and chain guide can easily be inspected or removed, without disassembly of the complete unit.
- Designed to FEM 1Am. H3 (HMI)
- Main line contactor for increased safety.
- Duty cycle 50\% ED for single speed.
- Electromagnetic spring pressure brake holds the load safely even in the event of power failure.
- The externally adjustable slip clutch is designed to guarantee a permanent connection between the load and the brake.
- Motor classification H3 and protected to IP 55 against ingress of dust and water jets.
- Standard operating voltage: $400 \mathrm{v}, 3 \mathrm{Ph}, 50 \mathrm{hz}$.
- Increased operating safety through $42 v$ low voltage control with encapsulated pendant control to IP 65.
- Available with top hook suspension point or suspension lug for reduced headroom and easy integration into trolley applications (customer to specify at time of order).
- The oil bath lubricated gearbox contains case hardened helical cut gearing for smooth, low noise running, and enhanced lifetime.
- Fully compatible with the VTE/S range of trolleys.
- Operating temperature $-10^{\circ}$ to $+40^{\circ}$

## CPV/F ELEETRIC HOISTS [400v 3Ph 50hz]

## CPE/F ELECTRIC CHAIN HOISTS [400v 3Ph 50hz]

## HIGH CAPACITY

## Electric chain hoist, model CPE/F, with suspension hook or integrated travel trolley

Capacities: 1600-10000kg

The CPE/F series is a range of high quality products for professional applications. They are highly efficient and engineered for a long working life. The hoists are composed of three main component parts which makes servicing easy.

## Features include:

- The standard, oil bath lubricated planetary gear box is particularly smooth running and provides for a low overall height.
- Low voltage control (42volt).
- The 5-pocket load wheel, manufactured from wear resistant case hardened steel is matched perfectly to the load chain to guarantee smooth and precise chain motion.
- Motor fitted with bimetallic thermal protection, used with low voltage control.
- The heavy duty squirrel cage motor has an adjustable spring pressure brake that holds the load securely even in the event of a power failure.
- Case hardened and zinc plated link chain.
- The motor is designed for high duty cycle.
- 400V, 3-phase, 50 Hz eurovoltage.
- Duty cycle $40 \%$ ED for single speed.
- Motor protected to IP54, insulation class F.
- Operating temperature $-10^{\circ}$ to $+50^{\circ}$
- The model CPE/F 100-2 consists of two CPE/F 50-2 units that are connected by a framework.
- Limit switches available on 1.6 t to 7.5 t only.

## Options:

- Standard suspension hook (non swivel).
- Suspension hook rotated through $90^{\circ}$ (non swivel).
- Manual and electric trolleys.
- Festoon cable system.
- Stainless steel load chain.
- Chain container.
- Motor with stainless steel brake.
- Radio remote control.
- Other operating voltages.

NOTE: Limit switches are not supplied as standard other than on the 10 tonne unit. They are available as an optional extra on the 1.6-7.5tonne hoists.

NB. All the above prices are based on a standard 3mtr HOL, with $2 m t r$ pendant, excluding chain bag.
*Single speed trolley @ $5 \mathrm{~m} / \mathrm{min}$
*Dual speed trolley @ $5 / 1.25$ m/min.
**Chain containers shown are linear metres chain.
***Add. heights of lift are sold as complete metres only.

- The extra HOL quoted includes for both load chain and pendant control cable. Note. std pendant is 2 mtrs .
- Extra pendant cable is available at $£ 12.01$ per metre.
- Load chain fitted to all models:
$11 \times 31 \mathrm{~mm}$, article number N06109488.
- Limit switch available as an optional extra on 1.6-7.5t (fitted as standard on CPE100).
- Raincoat to suit 1.6-5 tonne hoist article number: N4300007427 is available at $£ 159.41$
- Raincoat to suit VTE/F 1.6-5 tonne trolley motor: article number N4300015114 £68.79
- Raincoat to suit 7.5-10 tonne hoist, article number: N4300014354 is available at $£ 258.77$
- Raincoat to suit VTE/F 7.5-10 tonne trolley motor article number 192034056 POA
 ALL CPE's up to 5 tonne WLL are built at our chester facility and are normally
available on a available on a 2-3 day service. call the sales team to discuss express deliveries.

# Electric chain hoist, model CM Lodestar 

 110v, 230v \& 400vCapacities: 250-3000kg

or Ral2009

## Features and benefits include:

- Tough lightweight aluminium alloy covers totally enclose the mechanical and electrical components providing protection and efficient heat dissipation. The design enables easy access for installation and service.
- Adjustable upper and lower limit switches.
- 48 v control, IP65 pendant as standard (Hoist is IP54).
- Thermal overload protection as standard.
- FEM classification 2 m (40\% duty - 24 minutes continuous use per hour).
- Motor classification H4.
- Excellent closed height dimensions.
- A lifetime lubricated gearbox contributes to exceptional service and maintenance characteristics.
- Load hook with axial bearing.
- Ideal for long heights of lifts.
- Large frame, single phase hoists are supplied with handles and 1 mtr supply cable with Cee-Form plug.

## *Prices shown are inclusive of flat form cable and are for the standard system with pendant fitted to hoist.

 Stainless steel system is also available. Prices on request.
## RADIO REMOTE CONTROLS

The Magnetek Flex Base MRX, micro receiver, radio remote control is designed to be used with the CPE, CPV and Lodestar range of electric chain hoists. The unit can be factory fitted at time of ordering hoist, or supplied as a kit for you to retrospectively fit.

|  | Transmitter | Receiver |
| :--- | :---: | :---: |

Replacement transmitters are available upon request. Article no.192058790. Please supply serial number, and channel number at time of ordering to ensure radio control channel is matched to the receiver. NOTE: *100mtr range without any obstructions.

## RPE EEETRIC WIRE ROPE WINCHES (400v/230v)

## RPE electric winch

Capacities: 250-2000kg*

Yale wire rope winches are designed specifically for performance, efficiency, and safety, and offer many advantages and options.

Their extremely compact, practical cube design and universal rope lead-offs allow individual applications in almost any position and this makes them powerful aids for lifting and pulling loads.

The units are supplied with a certificate of conformity showing the units serial number and an operating instruction manual, which contains our manufacturer's UKCA and CE declaration.

## Features include:

- Voltage 400 v 3phase 50 hz or 230 v 1 phase 50 hz 3 phase motor protected to IP 54, insulation class F.
- Compact dimensions due to internal brake motor.
- Spur gear transmission with helical first gear - ensures smooth motion. Lubricated by grease and can therefore be used in any position.
- Spring pressure disc brake incorporated in the motor holds the load securely even in the event of a power failure.
- A plain rope drum is supplied as standard.
- The rope is secured to the drum in a recess, so that the rope can be wound onto the drum in several layers without damage.
- 10-6 and 20-6 units are fitted with slipping clutch as standard.
- 42v low voltage pendant control (inc. push button with emergency stop and 2 mtr cable) is supplied as standard.

## Options:

- Different drum designs, e.g. extended to accommodate longer rope, machined grooves for exact reeling, with separation web and 2 nd rope outlet for working with two ropes.
- Geared limit switches to limit rope motion in both directions (in combination with 42 v low voltage control).
- Slipping clutch to protect the winch from overloading for models RPE 2-13, RPE 5-6 and RPE 5-12.
- Radio remote control.
- Zinc-plated version is available on request.
- Stainless brake.
- When selecting the length of the rope please bear in mind that a minimum of 2.5 windings have to remain on the drum (approx. 1 mtr rope)
- RPE winches are not designed for passenger elevation applications and must not be used for this purpose.

## CPA PNEUMATIC CHAIN hOISTS

## Pneumatic chain hoists with hook Capacities: 125-980kg

Pneumatic chain hoists are characterised by high durability in a great number of industrial applications. The robust but light weight housing allows easy transportation.

## Features include:

- Designed for operating pressures of 5 to 7 bar.

- Rotating piston motor with 100 \% duty rating and an unlimited number of starts for continuous operation.
- Integrated limit switches for highest and lowest hook position as standard.
- Self-adjusting automatic disc brake, maintenance-free.
- Extremely sensitive control with emergency-stop for a precise positioning of the load.
- Air release for brake as standard for models CPA 2-31, CPA 5-17 and CPA 10-9

## Options:

- Pressure regulator, manometer, lubricator and support.
- ATEX basic version available on request.
- Chain container available on request.

## Applications:

Automobile and aircraft industries, shipyards, on ships and docks, foundries, on/offshore, paint factories, paint shops, refineries, oil depots, galvanizing, printing, textile, food industries, pulp, paper, cement mills, glass, ceramic industries, wood working industries, chemical industries, heat treatment and power plants etc.

# CPA heavy duty pueumatic chain hoists 

# Pneumatic chain hoists with hook or integrated trolleys Capacities: 2000-10000kg 

The conception is in accordance with the design of the model CPE. With $100 \%$ duty rating and an unlimited number of starts the model CPA is suitable for heavy duty applications. It is insusceptible to contamination, humidity and aggressive mediums from the outside. The hoists are composed of three main components which makes service easy and inexpensive.

Features include:

- Designed for operating pressures of 4 to 6 bar.
- Robust rotating piston motor has an adjustable spring pressure brake that holds the load securely even in the event of an air supply failure.
- The standard oil bath lubricated planetary gearbox is particularly smooth running and enables a low overall height.
- High starting torque due to switching valves in the motor body.
- Low noise emission due to large dimension silencer.
- Sensitive control by means of 2 resp. 4 button pendant control with emergency-stop.
- Up to 3000 kgs on single fall giving a low overall height.
- The 5-pocket load chain sheave, manufactured from wear resistant guarantee smooth and precise chain motion.
- Drop forged suspension and load hooks.

## Options:

- Manual and pneumatic trolleys.
- Pull cord control.
- Stainless steel load chain.
- ATEX version available on request.
- Chain container available on request.

compressed air supply must be filtered $\xi$ lubricated to ensure smooth operation.

## Yale Mtrac ${ }^{\circ}$ minr endiess winch

## INNOVATIVE ENGINEERING

Capacities: 66-500kg (two-fall design up to 1000 kg )
The YaleMtrac ${ }^{\circledR}$ endless winch combines state-of-the-art industrial design with technical innovation to solve a specific customer need - the need for a safe and simple handling solution for mobile applications.

We did just that. Because the rope of the endless winch is not collected during operation, there is no limit to the lifting height and traction length when using this product. And, with a full offering of wire ropes and accessories, this winch can be used in virtually any application requiring a hoist.

## STANDARD FEATURES

- Capacities 66 kg to 500 kg in single-reeved configuration (up to 1000 kg in two-part reeved configuration, optional).
- Control pendant (IP 65) is connected via a control cable.
- Standard 1 mtr power cable fitted with a CEE connector plug. - 42V low-voltage control.

Ergonomic, fitted carrying handle features a comfortable plastic grip.

- Mounting feet fixed on the housing for easy set up.
- Operating voltages of $400 \mathrm{v} 3-\mathrm{ph} 50 \mathrm{~Hz}$ or $230 \mathrm{v} 1-\mathrm{ph}, 50 \mathrm{~Hz}$

- Galvanized, high-density, rotation-resistant steel rope is 10 m long (dia. 6.5 mm ) and features a safety hook with a rounded, plastic-coated tip at the loose end.
- Two spring buffers with adjusting rings can be attached to the wire rope to set the limit switches for both upward and downward movement.

## FINISH DETAILS

- Drive sheave is made of especially hardened steel designed to ensure long service life.
- The patented (German Patent DE 102012100 099) bi-directional paddle actuator ensures the rope is safely guided and securely held in place.
- Slip clutch is located outside of the load path for added safety.
- Limit switches ensure safe cut-out for the upper and lower hook positions.

Electromagnetic brake holds the load safely, even in the event of a power failure.

- Winch is classified up to $1 \mathrm{Bm} / \mathrm{M} 3$ acc. to $\mathrm{FEM} / \mathrm{ISO}$.

Winch is protected up to IP 55.

| RLSP-08-HH | N43300012 | 4000 | Parallel hook | 8 | 4.5 | £52.41 |

The Yale load binder is a universal tool to restrain and secure loads and freight. Manual operation of the binder lever extends or retracts the threaded spindles. Clevis ends are for use with existing fastening devices or available with parallel hooks for direct attachment to chains.

## ASH WELD ON HOOKS

| Model | Article no. | Capacity <br> (WLL) kg | Weight <br> kg | Unit price <br> $£$ | Replacement safety latches <br> Article no. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Price $£$ |  |  |  |  |  |  |

Yale's weld on hooks are universal attachments for use on trucks, excavators, low loaders, and spreader beams, etc. The hook and safety latch are epoxy resin coated for added corrosion protection and the return spring is made from stainless steel.

## LMA cable grips

The LMG is a device for gripping, pulling, and tensioning unsheathed wire ropes, cables, and metal rods in all forms. The parallel jaws provide a firm, non-slip grip without causing damage to the wire. A special springloaded guide prevents the grip from dropping off the wire and affords instant release without jamming. The model LMG II-X is supplied with grooved jaws.
1 NB. It is the users responsibility to ensure that the selected cable grip is suitable for their grade of wire rope.

## PB pulley blocis, hinged, with single steel sheave

One side of the Yale pulley blocks is hinged and can be opened for easy and quick positioning of the wire rope on the sheave. It can also provide a quick and versatile rigging point or redirect a wire rope.

## Features include:

Swinging the hook in the direction of pull securely locks the pulley block.

- The high quality cast steel sheaves have machined grooves and are fitted with Permaglide® bushes.
- When choosing, and classifying pulley blocks, take the 'principles for rope drives' DIN 15020 into consideration.

| Model | Article number | Capacity (WLL) kg | Max. rope diameter mm | Weight kg | Price £ |

## YBF/A SPRING BALANEERS

## Spring balancers

Capacities: 0.5-200kg

Yale is now able to offer a wide range of spring balancers and retractors.
Spring balancers allow the worker to move the suspended tool or object up or down with very little effort. Depending on the spring adjustment, the object will remain in position or retract when no force is applied.

With a spiral groove on a tapered drum, the winding radius is increased to match the torque build-up of the spring, thus neutralising it and achieving a balanced condition. This is the main difference between spring balancers and retractors.

PORTABLE TOOLS

Retractors are designed to retract the cable when no force is applied. An amount of downward force must be continually applied to keep the suspended object at its extended position. The torque output of the rewind spring increases as the cable is extended, and retracting the suspended object to the uppermost adjusted position when released.

YBA-22

- YBF series, 0.5-200kg (standard type).

Enclosed body design ensures operator safety; no trapped fingers or hands. The YBF has an anti-wear feature that prevents damage to the aluminim housing and can be replaced without dismantling the housing. Wire replacement can be done without dismantling the body. The containerised spring cartridge enables safe and simple servicing.

- YBA series, 9-70kg with additional safety-device (wire arrest mechanism).

The YBA series has all of the features of the YBF series, but also has a wire arrest system. This is ideal for applications where there is the possibility of damage to the wire strands, e.g. fabrication, welding production lines and anywhere where there is a repetitive process.

## Possible applications include:

- Resistance spot welding machines
- Measuring machines
- Compressed air equipment
- X-Ray apparatus
- Power tools (electric driven)
- Welding machines
- Welding templates
- Paint spraying apparatus
- Cages

Load indicator
for models
YBF-09 up to YBF-70 YBF-22L up to YBF-70L YBA-15 up to YBA-70 YBA-22L up to YBA-70L

Suspension eye according to DIN 15112 spring balancers must be equipped with additional suspension eyes for the attachment of secondary safety chains.

Manual drum-lock
for an easy exchange of the rope. All s with capacity more than 5 kg .

Please note that these spring balancers are not liftingdevices and should not be used as a load arrester.

## Crane weighers

## Measuring range: 0-12 tonne

The Tigrip crane weighers, TKL and TKR, are compact measuring devices for the weighing of loads. The TKL model is the standard digital display unit and the TKR model comes complete with a radio remote control.

Use appropriate attachments like grade 8 forgings between the hook of the hoist or crane, the crane weigher, and the load. They are very simple and straight forward to use!

The crane weighers have a liquid crystal display (LCD), which can tare as well as show either the gross or the net load. It also indicates overload at $110 \%$ of the rated capacity and the status of the battery.

## Model: TKL (WITHOUT remote control)

## Features and benefits include:

High accuracy.
V Lightweight design.
V Easy-to-read display.

- Easy to use.

Robust design.

- Housing can be rotated $180^{\circ}$

V Retains the peak value to memory
The battery capacity provides for around 200 operating hours.

- Automatic setting to zero when crane weigher is switched on.
- Use of rechargeable batteries possible (external battery charger*).
ح Display of maximum weight (gross/net).
V Display of measuring units at the load indicator.
V Measuring units: kg , tonnes, lbs, and kN.
Automatic stand-by for a prolonged battery lifetime.
Simple change of batteries.
Warning, if batteries are low.
- Overload warning.

## Model: TKR (WITH remote control)

The TKR crane weigher can be operated by radio control. The displayed values can be taken off the remote control device and can be easily transferred to a PC. The system can be combined with an easy-to-read display. Several measured values can be totalled and saved.

## Included in delivery of TKL:

TKR has the same features as the TKL model plus:
V Remote control and data exchange via radio transmission.
v USB interface.

- Accumulation memory .

Included in delivery of TKR:
$\checkmark$ Crane weigher.
$\checkmark$ Remote control with display.
$\checkmark 7 \times 1.5 \mathrm{~V}$ AA batteries.
$\checkmark$ Test certificate.
$\checkmark$ PC cable.
$\checkmark$ User software.
$\checkmark$ Carrying case.

## Technical data on TKL and TKR:

- Operation time, approximately 200 hours with $4 \times 1.5 \mathrm{~V}$ AA batteries.
- Temperature range when in operation $-10^{\circ} \mathrm{C}$ to $+50^{\circ} \mathrm{C}$.
- Temperature range when in storage $-20^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$.
- IP 54 protection.
- 20.5 mm high LCD display ( 4.5 digits).
- Tare range is $100 \%$ of rated capacity.
- Overload warning at $110 \%$ of the rated capacity.

| DIMENSIONS |  |  |  |  |  |

These units are supplied with replaceable AA batteries.
As an option you may replace these for re-chargeable type.
The design allows for easy calibration and maintenance.

## 

## Load indicators

## Measuring range: 0-20 tonne

The Tigrip load indicators, TZL and TZR, are compact measuring devices for the weighing of loads. The TZL model is the standard digital display unit and the TZR model comes complete with a radio remote control.

On account of their flexibility, these load indicators are suitable for a multitude of applications. Whether used as a conventional crane weigher or to measure forces, it is the economical choice for various applications. They are very simple and straight forward to use!

The load indicators have a liquid crystal display (LCD), which can tare as well as show either the gross or the net load. It also indicates overload at $110 \%$ of the rated capacity and the status of the battery.

## Model: TZL (WITHOUT remote control)

## Features and benefits include:

$\checkmark$
High accuracy.
$\checkmark$ Lightweight design.
$\checkmark$ Easy-to-read display.
$\checkmark$ Easy to use.
$\checkmark$ Robust design.

## It's your life... it's our reputation.

Yale believes in total commitment to safety awareness, resulting in a better working environment. Yale is dedicated to the understanding of customers' needs at all levels and offers a broad range of equipment designed with the exact end-user requirements. Yale's comprehensive range of safety products is manufactured under ISO9002 accreditation and meets all relevant UKCA and European CE standards.

Whether you have already purchased Yale products or are a potential user, instruction and training is a requirement as stated in the Work at Height Regulations 2005.

## The Working at Height Regulations 2005 Main points:

- Working at height, no longer means above 2 metres before PPE is required. The new regulations state "Where a person could fall a distance liable to cause personal injury".
- Make sure you have done the following:
i) Method statement
ii) Risk Assessment
- Have a rescue plan in place. Do NOT rely on the Emergency Services.
- Train people in the use of Fall Protection Equipment.
- Inspection of Fall Protection Equipment (keep records).

NB: This is only a brief description of the regulations. For a full copy visit: www.hse.gov.uk

## Fall Factors

## Calculating the potential fall distance:

When using a shock absorbing lanyard, it is important to understand how to calculate the potential fall distance to avoid contact with the lower level. The calculation below gives the minimum fall distance between the anchorage point of the lanyard (Fall Factor 2) and the lower level.

This is calculated by allowing for:

- twice the length of the lanyard (to allow for the length of the lanyard and the height of the worker).
- $\quad+1.75 \mathrm{mtr}$ deceleration distance to allow for elongation of the shock absorber and any give in the lanyard.
- +1 mar safety margin.
- TOTAL $=6.75 \mathrm{mtr}$ clearance required using a 2 mtr lanyard.

Best option

## HEIGHT SAFETY KITS

## Basic kit $\quad$ £74.25

Model: CMHYP02
Article number: N37420002A
$1 \times$ Single point harness
$1 \times 2 \mathrm{mtr}$ shock absorbing rope lanyard
$2 \times$ Screw gate snap hooks

## Crane maintenance kit <br> £112.46

Model: CMHYP06
Article number: N37420006A
$1 \times$ Two point harness
$1 \times 2$ metre twin tail shock absorbing web lanyard
$2 \times$ Scaffold hooks
$1 \times$ Screw gate snap hook
$1 \times$ Kit bag

## HEIGHT SAFETY PRODUCTS

## Single point harness

Model: CMHYP10
Article number: N37020010

Single point full body, entry level harness, with rear 'D' attachment point. Fits up to a 48 " chest. Conforms to BS EN361.
$£ 33.84$

Three point harnes:
Model: CMHYP20
Article number: N37020020

Three point harness with front ' $D$ ' and side 'D' attachment points. Conforms to BS EN361 \& BS EN35i
$£ 66.60$

Four point quick connect harness
Model: CMHYP56A
Article number: N37020005

Four point harness c/w work positioning belt and quick connect buckles.
Conforms to BS EN361 \& BS EN358
£132.11

Harness

## Rescue harness

Model: CMHYP10R
Article number: N37020011
Harness with front \& rear 'D' attachment points with the added rescue anchorage point.
Conforms to BS EN361.
$£ 48.04$

## Extra large two point harness

Model: CMHYP35XXL
Article number: N4300008966
Two point full body harness with front \& rear ‘D' attachment points.
Fits chest size up to 55 "
Conforms to BS EN361.
$£ 46.95$

## Riggers harness

Model: CMHYP70
Article number: N37020070

Five point full body harness. Conforms to BS EN361, BS EN358, and BS EN813
£174.70

1.5 metre $\times 12 \mathrm{~mm}$ rope lanyard c/w 2 screw gate connectors.
(Article: N4300006104)
£33.84
Model: CMHABMLB121scaff
2 metre $\times 12 \mathrm{~mm}$ rope lanyard c/w 1 scaffold hook \& $1 \times$ screw gate connector.
(Article: N4300006105)
$£ 44.77$

## Model: CMHABMLB121Sscaff

1.5 metre $\times 12 \mathrm{~mm}$ rope lanyard
c/w 1 scaffold hook \& $1 \times$ screw gate connector. (Article: N4300006106)
$£ 43.68$

Model: CMHABMLB102scaff
2 metre $\times 12 \mathrm{~mm}$ twin tail rope lanyard c/w 2 scaffold hooks \& 1 screw gate connector. (Article: N4300006108)

Model: CMHABMLB100-20
2 metre $\times 12 \mathrm{~mm}$ adjustable lanyard c/w 2 screw gate connectors.
(Article: N4300008280)
$£ 45.86$
*All lanyards conform to BS EN354 \& BS EN355.

## WEBBING

## Model: CMHABMT

2 metre webbing lanyard c/w $2 \times$ screw gate connectors.
(Article: N37220026)
£40.40

Model: CMHABMTS
1.5 metre webbing lanyard
c/w $2 \times$ screw gate connectors.
(Article: N4300006111)
£39.30

Model: CMHABMTscaff
2 metre webbing lanyard c/w $1 \times$ scaffold hook and 1 x screw gate connector.
(Article: N37220028)
£61.14

## Model: CMHABMTSscaff

1.5 metre webbing lanyard
c/w 1 scaffold hook and $1 \times$ screw gate connector.
(Article: N4300006112)
$£ 54.59$

Model: CMHABM2Tscaff
2 metre twin tail webbing lanyard
c/w 2 scaffold hooks \& $1 \times$ screw gate connector.
(Article: N4300006101)
$£ 72.94$
*All lanyards conform to BS EN354 \& BS EN355.

## RESTRAINT

## Model: CMHLB100-20

2 metre $\times 12 \mathrm{~mm}$ adjustable restraint lanyard c/w 2 screw gate snap hooks, BS EN354.
(Article: N4300012503)
£36.03

## Model: CMHLB100-20scaff

2 metre $\times 12 \mathrm{~mm}$ adjustable restraint lanyard $\mathrm{c} / \mathrm{w}$ 1 x scaffold hook and 1 x screw gate snap hook, BS EN354. (Article: N4300008410)

## Model: CMHLB121-10

1 metre $\times 12 \mathrm{~mm}$ restraint lanyard c/w 2 screw gate snap hooks, BS EN354. (Article: N4300006134)

## £29.48

Model: CMHLB121-15
1.5 metre $\times 12 \mathrm{~mm}$ restraint lanyard c/w 2 screw gate snap hooks, BS EN354.
(Article: N4300006133)

## Model: CMHLB121-20

2 metre $\times 12 \mathrm{~mm}$ restraint rope lanyard c/w 2 screw gate snap hooks, BS EN354.
(Article: N37220024)
£30.57

## FALL ARREST BLOCKS

## Cable blocks 6-15 metre

Model: CMHCR250v06-2 (192066967)<br>6 metre fall arrest block with 4 mm diameter cable. Fitted as standard with fall indicator in connector. WLL 120kg. Unit weight 4kg

Model: CMHCR250v10-2 (192066968)
10 metre fall arrest block with 4 mm diameter cable. Fitted as standard with fall indicator in connector. WLL 120 kg . Unit weight 4.2 kg

Model: CMHCR250v12-2 (192066972)
12 metre fall arrest block with 4 mm diameter cable. Fitted as standard with fall indicator in connector. WLL 120 kg . Unit weight 4.7 kg

Model: CMHCR250v15-2 (192066973)
15 metre fall arrest block with 4 mm diameter cable. Fitted as standard with fall indicator in connector. WLL 120 kg . Unit weight 4.9 kg
£418.18

## Retrieval block 25 metre

Model: CMHCRW30025 (Article: 192040308) 25 metre fall arrest / retrieval block for fall arrest and rescue with 4.7 mm diameter galvanised steel cable. Max. rated load 100kgs, minimum rated load 50 kgs . For lifting \& lowering personnel only. Conforms to BS EN360, BS EN1496 Class B.

Cable blocks 20-25 metre
Model: CMHCR30020 (Article: N37320020) 20 metre fall arrest block with 4mm diameter cable. Fitted as standard with fall indicator in connector. WLL 120 kg . Unit weight 11.25 kg .
*Replacement rope $20 \mathrm{~m} \times 4 \mathrm{~mm}$ N4300007540 £63.27
£498.97
Model: CMHCR30025 (Article: N37320025) 25 metre fall arrest block with 4 mm diameter cable. Fitted as standard with fall indicator in connector. WLL 120kg. Unit weight 11.5 kg .
*Replacement rope $25 m \times 4 m m$ N4300007541 £68.37

## Webbing blocks

Model: CMHWR100-06 (Article: N4300013778)
6 metre fall arrest block with 17 mm wide webbing polyester - Kevlar fibres. Fitted as standard with fall indicator in connector.
WLL 120kg. Unit weight 1.7 kgs .
Model: CMHAH210 (Article: N37320035) 2.25 metre mini retractor with 45 mm wide webbing. Fitted as standard with fall indicator in connector. WLL 120kg. Unit weight 1.2 kg .

## TRIPODS, WINCHES, RESCUE \& ACEESSORIES

Tripod (1.75mtr closed height)
Model: CMHTM9
Personnel tripod for lifting \& lowering. Max. 1 user. (140kg) Height to underside 1340-2300mm. Footprint dia. 1.66-2.36mtr. Weight 17kg. Conforms to BS EN795
$£ 596.14$
Article: N37320039
NB: To use as a material tripod you need to replace the connector with 500kg WLL connector Article: 192063945
$£ 52.41$

## Work positioning

Model: CMHAF130-02
$£ 77.52$
$\underline{2}$ metre work positioning device c/w shortener. Conforms to BS EN358. (Article: N37220029)

Model: CMHAF130-04
$£ 80.80$
4 metre work positioning device c/w shortener.
Conforms to BS EN358. (Article: N37220030)

## HYDRAULIC JACKS AND TOOLS

## Why hydraulics?

Hydraulics, or fluid mechanics, offer extremely high forces with compact construction, which gives portable lifting, pushing and pulling power for numerous applications. There is no other kind of power transmission that will provide comparable high forces with the same compact size.

## Hydraulics tools

The specialised design of hydraulic tools provides flexibility to engineers looking for a solution to lift, push or pull in general assembly and repair jobs. The compact construction provides a versatile tool that is capable of being used in a number of universal applications.

The robust construction of the Yale range of hydraulic cylinders have been designed to withstand the arduous conditions experienced in heavy duty industrial applications. Depending on the application, the user can specify from a range of hand pumps, electrically powered pumps and controls in 3 phase and single phase construction. Yale also offers a range of air powered pumps and petrol engined pumps where mains electricity is not available.

How to reach high forces in hydraulics?

| Area | $x$ | pressure | $=$ | force |
| :---: | :---: | :---: | :---: | :---: |
| Effective <br> piston area | $x$ | system <br> pressure | $=$ | force |
| $\mathrm{cm}^{2}$ | $x$ | bar | $=$ | daN |

Example: Hydraulic cylinder YS10/...

| $14.3 \mathrm{~cm}^{2} \times 700 \mathrm{bar}$ | $=10010 \mathrm{daN}$ |
| ---: | :--- |
|  | $=100 \mathrm{kN}$ |
|  | $=10 \mathrm{ton}$ |

Linear conversion of pressure force:
The above formulae shows that pressure forces can be converted linearly.

Example: A 10ton cylinder presses at -

| 700 bar | - | 100 kN | $=$ | 10 t |
| :---: | :---: | :---: | :---: | :---: |
| 350 bar | - | 50 kN | $=$ | 5 t |
| 100 bar | - | 14 kN | $=$ | 1.4 t |
| 1bar | - | 0.14 | $=$ | 0.014 t |

## Basic terms in hydraulics

## Pressure

is the system pressure generated by the hand pump, however, this can also be produced from an external power source.

## Force

is the pressure transferred by the hydraulic cylinder proportional to the load up to the maximum capacity.

## Stroke

is the piston rod travel distance to be achieved by the relative force (no-load stroke, loaded stroke, return stroke).

## Piston travel speed

is the time taken for the piston rod of the hydraulic cylinder to travel through a fixed distance.

## Hydraulic cylinders

are available in different designs with two basic types. SA=single acting and DA=double acting.

Bronze bearings minimize friction even in cases of eccentric loading

## YS UNIUERSAL CYIINDERS

Single-acting with spring return,
5 to 100 tonne, maximum operating pressure: $\mathbf{7 0 0}$ bar.
For all universal operations where high forces and compact dimensions are required. Robust cylinder design, manufactured from chromiummolybdenum steel with hard chromium plated piston and large bronze bearings. Includes: saddle, mounting threads, and female coupler half.

## YLS/YFS LOW PROFILE

Low height and flat cylinders. Single-acting with spring return, 10 to 100 tonne, maximum operating pressure: $\mathbf{7 0 0}$ bar.

Very compact hydraulic cylinders designed for general lifting and positioning jobs as well as for all basic maintenance applications, where high power, low height, portability, and light weight are required. Includes: female coupler half.

Single-acting with spring return,
12 to 93 tonne, maximum operating pressure: 700 bar.
Due to the centre hole design, a threaded rod can be placed through the hollow cylinders, so that extremely high pulling forces can be achieved. This allows applications, such as pre-stressing of anchor bolts, removal of axle bushings, extracting tubes or for general heavy duty pulling jobs. Includes: saddle, mounting threads, and female coupler half.

| Model | Cylinder <br> size <br> tonne | Pull <br> capacity <br> kN | Stroke | Centre <br> hole dia. <br> mm | Price |

## YH universal cyinnors

Double-acting with hydraulic return, 5 to 200 tonne, max. operating pressure: 700 bar

Double-acting cylinders with high retraction speed. The powerful return of the piston, the extra long piston bearings, and the high-grade material make these cylinders extremely robust and suitable for the toughest of jobs.

## YOH hollow cylinders

Double-acting with hydraulic return, 33 to 140 tonne, maximum operating pressure: 700 bar.

Due to the centre hole design a threaded rod can be placed through the hollow cylinders so that extremely high pulling forces can be achieved for applications such as pre-stressing of anchor bolts, removal of axle bushings, extracting tubes and with puller sets for general heavy duty pulling jobs. Includes: saddle, mounting threads and female coupler half.

## YELB cylinders/SAFETY LOCK

Cylinders with safety lock nut Single-acting, 30 to 1100 tonne Max. operating pressure: 700 bar

Recommended when loads have to remain in the raised position over a period of time. The safety lock nut ensures a positive load hold in any position and work can be carried out beneath the raised load. Hydraulic pressure can be released so that cylinders work like mechanical supports. Pumps can be separated from cylinders.

## HAM HMTHFS BALIBRATED

## GGY pressure gauges

For use when the operating pressure (the force of the connected cylinder) needs to be monitored. To absorb shock loading, these Yale gauges are glycerine filled. Also available calibrated as an optional extra.

## GYA pressure gauge set

Suitable for connection to all HPS hand pumps. Assembled and ready to use. Consists of pressure gauge and corresponding gauge adaptor.

## Pressure gauge adaptor

This pressure gauge adaptor is suitable for connection to all HPS hand pumps. Gauge connection with sleeve nut and $30^{\circ}$ angle for easy reading.

Pressure gauge adaptor set
This pressure gauge adaptor set is suitable for connection to all HPH hand pumps (double acting cylinders).

## HHL hydraule hoses

Durable, yet highly flexible thermoplastic hydraulic hoses guarantee a very long service life. High safety factor, with a burst pressure of 2800 bar.

Connections 3/8 NPT.
Hose Oil Volume: $35 \mathrm{~cm}^{3}$ per metre.

- Male coupler half is supplied as standard with the hoses.

## AVS/M ACEESORIES

## Lifting claws

In conjunction with the corresponding hydraulic cylinder, a lifting claw represents a compact, lightweight, and versatile lifting unit.

## Piston plates

Can be screwed into the piston thread of cylinders. They reduce surface pressure and prevent the pistons from sinking into the ground.

## Base adaptors

The use of extension tubes adds to the versatility of the standard cylinders.

## Support plates

Used to spread the load, they protect the cylinders from tipping or sinking into the ground.

## Clevis eye mountings

Screwed onto the piston and bottom of the hydraulic cylinder, in those cases where conditions require pivoting of the cylinder.

| Model | Description | Suitable for | Price £ |

## Manifolds, 700 bar

Manifolds are used when several hydraulic cylinders have to be connected to one hydraulic pump.
All manifolds are equipped with $3 / 8$ NPT inner oil ports, so that fittings, hydraulic hoses, and couplers can be easily attached.

## Manifolds with shut-off valve

Manifolds with shut-off valves are used when different pressures must be maintained in each hydraulic line. Therefore, they allow the lifting of unequal loads. Manifolds are ready assembled and can be screwed directly to a hand pump or power pack.

## USM/NHM/NPR/VPS valves a PRESSURE SWITCH

## VSM safety-check valves

These safety-check valves are used for those applications where pressure drops (eg holding of a raised load) must be avoided.

VHM throttle-/Shut off valves
These valves are used to shut-off hydraulic lines especially in multiple cylinder systems. The needle valve VHM-1 also allows you to throttle an oil flow especially within lifting applications

VPR external pressure relief valves Pressure relief valves are used when the system pressure (force of the connected hydraulic cylinder) should not exceed a certain value.

VPS pressure switch
This precision adjustable pressure switch can be set to any pressure value between 5 and 700 bar by means of a screwed adjuster. When the preset pressure value is reached, an electrical contact is activated. For use with electrically operating directional control valve.

## Safety-check valves, throttle-/shut off valves

## PYB 'GORDLESS' BATTERY POWER PUMP

## Operating pressure max. 700bar

The Yale PYB cordless battery power pump provides a flexible addition to the Yale hydraulic programme. This extremely compact and lightweight power pack gives the user the freedom to operate in areas where there is no power source, increasing productivity over the conventional hand pump and all at the push of a button.

The power pack utilises a standard Hitachi Li-ion battery and charger to maximise operation.

Ideal for a range of applications using small to mid size single-acting cylinders, hydraulic spreaders, lifting wedges, nut splitters and much more.

## FEATURES

- One-Hand-Operation. Push-button integrated into ergonomic handle.
- Two-stage operation with automatic switch-over.
- With internal pressure relief valve.
- Reservoir made from aluminium, extreme low weight.
- Protective cover to prevent inadvertent switch on of pump.
- Rubber tank bladder enables the pump to be used in any position.

## SCOPE OF DELIVERY

- Electric power pack, battery driven.
- Oil filled ready for work.
- Female couple half CFY-1.
- Shoulder belt.

NEW DEVELOPMENT CORDLESS TECHNOLOGY FOR MOBILE OPERATION

Optional pressure gauge model GYA-63

One-Hand-Operation push-buttom integrated ergonomic handle

## YCL-201 hYDRAULIC CHAIN CUTTER

The Yale hydraulic chain cutter, model YCC-201, is designed for safe and quick cutting of high-tensile chains up to 13 mm diameter. It is suitable for grade 80 and grade 100 chains.

The cutting force is supplied by the standard single-acting cylinder model: YS-23/50.

## Recommended pumps:

- Air powered pump: PAY - 6.
- Electric power pack: PY - 04/2/5/2 M (N12300132)
- Hand pump: HPS - 2/0.7 (N12101012)
- Cordless pump: PYB (see page 59).

The return of the moveable blade is performed by the return spring of the hydraulic cylinder after relief of the hydraulic pressure. In combination with the PY-04/2/5/2M the blade returns automatically.
*The chain cutter has two blades, a 'fixed' blade and a 'moveable’ blade. Both blades are identical and interchangeable.

The unit is also equipped with a unique chain support bar (shown above). This allows for perfect positioning of the chain link and leads to a much longer service life.

| Description | Article number | Price |

| £ |  |  |
| Complete unit |  | N13900934 |
| Single replacement blade | N13900008 | £303.53 (each) |

## PY 'portable hydraulic power pumps

## Electric motor pumps, portable

Model PY-04
Operating pressure mx. 700bar
These light-weight, yet powerful two-stage pumps, are specifically designed for maintenance and repair jobs. Depending on their type, they can either operate single or double acting hydraulic cylinders.

The ideal combination of manually operated valve and pendant control provides the operator with ample freedom of motion and ensures safe holding of the load.

With their light weight and convenient carrying handle, these pumps can be easily transported.

| Model | For cylinder | Control valve operation | Reservoir litres | Motor | Displacement  <br> no load  <br> I/min $\|$under load |  | Weight kg | Price £ |

[^17]
## HAW S hydraulic repair Set

The maintenance repair set is indispensable in factories and workshops. It provides controlled hydraulic force for universal applications, such as pressing, straightening, lifting, flattening, pushing bolts, bending, spreading, tensioning, etc.

| Model | Article <br> number | Pressing <br> power <br> t | Cylinder <br> stroke <br> mm | Weight | Price |
| :---: | :---: | :---: | :---: | :---: | :---: |
| HAW S 10,0 | 32457050 | 10 | 152 | 34.5 | $\mathbf{£ 2 8 1 . 7 0}$ |

## YSW hyoraulic a Mechanical wedees

Yale's range of hydraulic and mechanical wedges and spreaders are designed to compliment the existing range of maintenance tools.

## USER FEATURES

- Practical, portable and lightweight
- Moulded plastic handle for comfort
- Revolving handle to aid horizontal or vertical spreading
- Offset handle is directly over the centre of mass
- Removable handle for improved access
- Swivel hose coupler with elbow - improves access by allowing hose to revolve
- Spread indicator markings for clear precise visual progress feedback

## SAFETY FEATURES

- No finger pinch-points
- Increased step depth on upper steps
- Safety lanyard - 1.0m length
- Partially recessed coupler reduces coupler vulnerability
- Forged key components for strength and reliability

## MAINTENANCE FEATURES

- Rapid disassembly and assembly
- Quick jaw replacement - remove 1 fastener
- Quit tip replacement - remove 2 fasteners
- Narrow jaw teeth - improved tool wear.

Kits are supplied as standard with the HPS 2/0.7A. There is the option available to have the PYB-0.6 Cordless Pump (see page 59) instead, for an additional $£ 1539.80$ which includes battery and charger. call the sales team to discuss.

## BMZ 'INTEERATED' hYoraulic puller kits

## Puller set with integrated hydraulic pump - 6, 8 and 11 tonne.

Hydraulic pullers are an invaluable tool for the maintenance engineer. The pullers provide time and cost savings, as they offer a high level of working safety and can be operated in all positions.

Hydraulic pullers are used in all kinds of industries, workshops and in many repair and assembly jobs to remove or install interference fit parts, such as: gears, couplings, bearings, wheels, pulleys, axles, shafts, brake drums, and many other press fit components.

| Model | Pulling force tonne | Article number | Piston stroke mm | Maximum arm reach (a) mm | Maximum diameter (b) mm | Length (c) mm | Weight <br> kg | Price <br> £ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| BMZ-11 | 11 | N13500611 | 82 | 230 | 280 | 345 | 8.0 | £537.18 |

## BMI 'modular' hyoraulic puller kits

Puller sets with separate hydraulic components - 10, 15, and 23 tonne. Pulling force Max. 10-23 t

Hydraulic pullers are an invaluable tool for the maintenance engineer. The pullers provide time and cost savings, as they offer a high level of working safety and can be operated in all positions.

The harder the pulling force, the tighter the grip on the jaws. Longer jaws up to 1000 mm are available on request.

Hydraulic pullers are used in all kinds of industries, workshops, and in many repair and assembly jobs to remove or install interference fit parts, such as: gears, couplings, bearings, wheels, pulleys, axles, shafts, brake drums, and many other press fit components.

* Other types and capacity pullers are also available upon request. Please contact our sales team for further details.

## JI 'UNIVERSAL' BOTTLE JACKS

## Lifting capacities 2-50 tonne

The JH bottle jack is ideal for general operations such as lifting, pushing, moving, and supporting all kinds of loads.

| Model | Article <br> no. | Capacity <br> kg | Closed <br> height <br> mm | Stroke <br> mm | Screw <br> extension <br> mm | Weight | Price |

## AJI/S alUMINIUM JaCKS

## Lifting capacities 6.5-100 tonne

Aluminium jacks combine lightweight with high lifting capacity. The use of high tensile aluminium alloy allows lifting capacities of up to 100 tonne resulting in a very favourable 1.8 tonne lifting capacity per 1 kg weight ratio.

Operation of Yale hydraulic jacks is very simple. Jacks are supplied ready for use including hydraulic oil, operating lever, and where applicable carrying handle and lifting claw.

Features:

- Extremely low weight.
- Strokes from 75 to 305 mm .
- All jacks provided with an overload protection valve.
- Hardened alloy steel saddle and sensitive lowering valve which is activated by the operating lever.

| Model | Capacity tonne | Max. capacity of lifting claw tonne | Stroke mm | Closed height mm | Base plate dimensions mm | Min. height of lifting claw mm | Weight <br> kg | Price $£$ |

## BUA [formerly hTJ] hYDRAULIC TOE JACKS

Our range of hydraulic toe jacks, formally known as HTJ, are ideal when working in very confined spaces. Typical uses include lifting and positioning of heavy machinery, fabricated steel structures, and general engineering applications.

## Features include:

Lifting capacity of 3, 6, 10 and 15 t, on the head and toe

- Extremely low entry height of the toe.

Operating lever rotates through $220^{\circ}$.

- Carry handle for ease of handling.
- Chrome plated plunger improves seal life and optimum performance.
- Heat treated and chrome plated medium -carbon steel cylinder.
- U.S. Patented by-pass device protects hydraulic system from over travel damage.
- Hydraulic system is protected from internal damage by a patented by-pass mechanism (U.S. Patent No. 5946912).

| Model | Article number | Claw capacity kg | Head capacity kg | Stroke <br> mm | Closed claw height mm | Closed head height mm | $\begin{gathered} \text { Base size } \\ \mathrm{L} \times \mathrm{W} \\ \mathrm{~mm} \end{gathered}$ | Weight kg | Price $£$ |

- These are the same as the old HTJ model. Only the colour and the model name has changed.

## MIS machine lifting jacis

## Lifting capacities 5000-25000kg

Multi-functional lifting jacks ideal for low-height lifting or working in confined spaces. These jacks can be used vertically or horizontally and the 25000 kg model has transport wheels for easy movement \& handling.

The 5000 and 10000 kg models have a $360^{\circ}$ rotatable claw making light work of loads. Pump levers can be removed for even better mobility.

Rail Jack, model RSJ
High stability on uneven ground is ensured by the extra large floor plate (e.g. gravel)

## Steel jacks <br> Capacities: 1500-10000kg

Steel jacks are used primarily for assembly applications, to brace or support loads. Mechanical steel jacks can basically be used to lift almost all kinds of loads in maintenance and repair, ship building, construction, as well as agriculture. The integrated carrying handle makes it a portable and versatile tool.

The load can be positioned either on the head or on the claw and by turning the operating lever the jack shaft moves smoothly and conveniently up and down along the rack.

The robust steel housing ensures a long service life, even in continuous use.

## Features and benefits include:

- The precisely machined gear box with optimal gear ratio ensures a minimum of effort and smooth operation.
- The load can be positioned either on the head or the claw.
- By turning the operating lever the jack moves smoothly and conveniently up and down along the rack.
- The self-locking, anti-kickback operating lever reduces the risk of injuries. The handle can be tilted for use in confined spaces.
- The load is held securely in any position. Inside the load brake the axial brake pressure is generated by the load itself, thus, it is proportional to the size of the load.

Model RSJ, floor plate.

## SK/S HEAYY DUTY NYLON WHEELED SKATES

## Moving loads the professional way!

Steerman is a worldwide supplier of load moving equipment with outlets throughout Europe, Africa, Asia and North America.

Designed for the professional load mover, these systems have been developed over a number of years to ensure total ease of operation and maximum safety.

Steerman load moving skates comprise of a steerable front section and a pair of adjustable rear trolleys. These innovative systems are available in capacities ranging from 10 to 60 tonnes and can be stripped down to component parts for easy transportation.

ATEX
Protection classification Available up on request.

## Features \& Benefits

## 1. Special Composite Wheel Equipment.

This unique material is machined from solid to produce the ideal wheel for use on modern industrial flooring. Hard enough to give incredibly low rolling resistance yet designed to protect expensive coated surfaces, unlike conventional metal wheeled skates.

## 2. Made from S.G. Iron rather than of Welded Construction.

This malleable material is immensely strong, is reproduced with total accuracy and is powder coated prior to assembly. Conventional steel fabricated units have to be much larger to achieve the same capacities and are therefore more cumbersome to use and transport.
3. Steerman's Three Point Loading System.

This ensures a safe and stable configuration which eliminates the risk of one skate rolling out from below the load. This design also ensures that loads are not carried on a reduced number of wheels when travelling.
4. Unique Turntable Design.

A special cast nylon material has been developed for strength and light-weight. Large diameter thrust bearings allow these turntables to swivel effortlessly while the special composite material ensures both antislip properties and greater impact resistance.

## LX 'BUDGET' NYLON WHEELED SKATES

## Load moving skates - ‘low cost’ option

## Capacities: 6000 and 12000kg

This LX range of load moving systems are now available as a 'low cost' alternative to our premium Steerman range of skates.

These three point loading systems comprise of a steerable front and a pair of adjustable rear skates that are supplied complete and ready to use.

The steerable front skates (LX-6F and LX-12F) are supplied complete with steering handle/towing bar and the rear skates (LX-6/12R) are supplied complete with two adjustable alignment bars.

## SCS caterpillar skates

Steerman Caterpillar Skates provide an economic and robust solution to many load moving and placement problems.

Features include:

- Carrying capacity of 20,30 or 60 tonne.
- Modular concept allows linking of units. Robust lockable steel container with nylon castors.
Low cost alternative for occasional use.

## RPB ROLLER PIMCH BARS

Roller pinch bars are an ideal companion for the professional load mover.
They are extremely simple to use and easy to transport. With their low toe plate height, they are able to get into the tightest gaps.

## LF ‘fIXED WHEEEE’ MOVING SKATES

## Load moving skates and systems with fixed wheels Capacities: 1000-6000kg

The components of the load moving skates can be universally combined and are ideal for transport of medium, heavy loads of all kinds. The components can be used individually or adapted into a load moving system.

## Features and benefits include:

- Units are maintenance-free.
- Solid forged steel construction.
- Anti-slip rubber lining.
- Abrasion-resistant nylon wheels.
- Models LF-2.5 and above are provided with two enclosed ball bearings per wheel.

| Model | Article <br> number | Capacity | Wheels | Number <br> of wheels | Wheel <br> dia. $\times$ width <br> mm | Dimension <br> $\mathrm{L} \times \mathrm{W} \times \mathrm{H}$ <br> mm | Weight | *Price |

## LFL 'Sterrable' moving skates

LFL-1-2

Load moving skates and systems with steerable wheels Capacity: 1000kg

The components of the load moving skates can be universally combined and are ideal for transport of medium, heavy loads of all kinds. The components can be used individually or adapted into a load moving system.

## Features and benefits include:

- Units are maintenance-free.
- Solid forged steel construction.
- Anti-slip rubber lining.
- Abrasion-resistant nylon wheels.
- Models LFL-1-2 uses two steerable and two fixed wheels.
- Model LFL-2-4 uses four steerable wheels.

[^19]
## Standard plate clamps with safety lock

## Working load limit (WLL) 50-3000kg

These clamps are primarily used for transporting sheet metal and steel plates in the vertical position, as well as lifting and rotating through $180^{\circ}$.

They can also be used for transporting steel constructions and profiles It is recommended to use a pair of plate clamps in conjunction with a spreader beam for long plate.

## Function

The jaw is opened and closed with the locking lever, except for the 92-500 which uses a positive spring-loaded cam.

The safety lock spring loads the cam jaw, preventing the clamp from opening even when there is no load on the jaw.

## Workmanship and parts

These plate clamps are service-friendly, making it easy to exchange parts, which are readily available. Clamp repairs can be done by a competent person.

NB: The plate surface of the material being clamped must have a hardness level below HRC 30/Brinell 300.
$\geqslant 2$ spare parts for the
92 series plate clamps are shown on page 193

## CY HINGED' VERTICAL PLATE CLAMPS

The CY plate clamps with hinged hook rings can be used for the safe handling of plate at various angles. It can lift plate from the horizontal and put it down in the vertical. The hinged hook ring ensures adequate gripping pressure in every position, but the load capacity reduces. See the diagram below showing the load / force capacities.

The main benefit of the CY hinged plate clamps is that longer plates can be lifted or handled, using two clamps on a two legged chain sling (as shown in illustration), thus eliminating the need for a spreader beam.

NB: The plate surface of the material being clamped must have a hardness level below HRC 30/Brinell 300.

*Per clamp.
The CX plate clamps shares all the benefits of the CY clamps, but are specifically designed for more heavy duty applications.

The other benefit that the CX clamps offers over the CY clamps is that vertically racked plates can be turned through $90^{\circ}$ (as shown in illustration).
NB: The plate surface of the material being clamped must have a hardness level below HRC 30/Brinell 300.

# Vertical 'high grip' plate clamp for hardened material 

## Working load limit (WLL) 25-500kg

The HG plate clamp has an extremely high clamping force which makes the clamp particularly suited to the transport of plate with a surface hardness up to HRC 40/Brinell 375.

## Function

This clamp is opened and closed with a locking lever. The safety lock spring loads the cam jaw, preventing the clamp from opening even when there is no load on the jaw.

## Workmanship and parts

This plate clamp is service-friendly, making it easy to exchange parts, which are readily available. Clamp repairs can be done by a competent person.

## TJC Twin jaw' vertical plate clamps

The TJC twin jaw vertical plate clamps have been specifically designed for lifting materials with low minimum weight, but large thickness. The main difference between the TJC and the CZ (which is our standard vertical plate clamp) is that the TJC has a unique twin moving jaw arrangement.

NB: The plate surface of the material being clamped must have a hardness level below HRC 30/Brinell 300.

## TAG/TWG WIDE JAW' VERTICAL CLAMPS

The TAG vertical clamps are extremely versatile. They have a large jaw capacity that enables them to be used on a multitude of applications such as loading machine tools, steel constructions, welding and numerous assembly functions. The design means that they do not require additional chain slings and are very easy and simple to use.

The automatic gripping force is retained by a positive tension jaw spring, even if there is slack in the chain. The clamps are also fitted with a 'Quick-Open' lever for ease of loading and unloading.

These plate clamps are service-friendly, making it easy to exchange parts, which are readily available. Clamp repairs can be done by a competent person.

Protective lined jaws, for non-marking, can be fitted up to 1250 kg WLL.

## *Per clamp.

## * Model: TWG

TWG vertical grab is a variation of the TAG. It is specially designed with a small outside measurement for use on hard to reach places such as loading billets on to a lathe etc.

## [J 'NON-MARKING' PLATE CLAMPS

The LJ non-marking plate clamps are designed for lifting, turning and transporting of structural steel plates, stainless steel, iron, timber and aluminium without marking, damaging or leaving indentations on the surface. It can also be used for steel plates with extremely hard surfaces.

These clamps are available with two different types of pads, rubber or leather. The type to be used is dependant on the surface of the material being gripped. If you have any concerns regarding the best option for your application please contact our sales team for advice.

These plate clamps are service-friendly, making it easy to exchange parts, which are readily available. Clamp repairs can be done by a competent person.

NB: The surface of the material being gripped must be free of oil, grease to ensure safe transport.

## TSB NON-MARKING 'FRICTION' PLATE CLAMPS

The TSB non-marking plate clamps with chain are designed for vertical lifting and transporting of plate material. This particular range of clamps has a large jaw capacity that enables it to be used on a multitude of applications.

The main feature of the TSB plate clamps is the fact that it is non-marking. It works through the process of 'friction'. This is achieved by a special material on the jaw and pad which is similar to brake linings.

Another benefit of the TSB, is that one grab can be used for lifting different materials such as concrete, wood, stone, and hardened steel.

These plate clamps are service-friendly, making it easy to exchange parts, which are readily available. Clamp repairs can be done by a competent person.

NB: The surface of the material being gripped must be free of oil, grease or any other liquid to ensure safe transport.

## OI horizontal plate clamps

## Industry standard horizontal plate clamps Working load limit (WLL) 1000-10000kg

The CH horizontal plate clamps have been specifically designed to be used in pairs for the transportation of plate bundles as well as single plates with a minimum thickness of 5 mm .

A pair of clamps used with a two legged chain sling are suitable for small plates. It is recommended to use two pairs in conjunction with a spreader beam for handling of larger plates. These units are supplied as standard with a smooth jaw. There is also the option of hardened steel teeth jaws for special applications. Please contact our technical department for further details.

## Workmanship and parts

## RH HORIZONTAL PLATE CLAMPS

## Horizontal plate clamps

Working load limit (WLL) 1500-5000kg
This range of horizontal plate clamps have been designed to be used in pairs, for the horizontal transportation of individual, and bundled plate. The clamp is fitted with a steel roller to reduce any potential marking of the plate.

These clamps are sold, and must be used in pairs. They should always be used with a two-legged chain sling (not supplied).

## ACH ADJUSTABIE HORIZONTAL PLATE CLAMPS

The ACH horizontal plate clamps offer superb flexibility because of the large adjustable jaw opening. The jaw is adjusted using a simple ratchet mechanism.
These clamps are to be used in pairs and are especially suited to the transportation of large plate bundles.

* Use spreader beams for larger plates

## THK Thiw sheer horizontal plate clamps

The THK horizontal plate clamps share the same basic design
features as the CH range of clamps but have a reversed tooth jaw This safety feature is designed for use with thin sheets which may have a tendency to deflect or sag or flex.

Suited to thin plate with a surface hardness less than 300 Brinell/32 Rockwell C.

| Model | WLL <br> $\mathrm{kg}^{*}$ | Jaw capacity <br> mm | Weight <br> $\mathrm{kg}^{*}$ | Price <br> $£^{*}$ |

## OE 'StaNDARD' GIRDER TURNING CLAMPS

The main purpose of the CG girder turning clamp is for the transportation and turning of steel girders (RSJ) through $90^{\circ}$ degrees.

It can be used individually, or for longer beams used in pairs in conjunction with a spreader beam as shown in diagram.

The clamp is attached to the horizontal flange of the girder and locked in place by the jaw locking lever. Once lifted the girder will turn through $90^{\circ}$ degrees.

TTR vertical flange girder stacking clamps

22
Spare parts for the TTR plate clamps are shown on page 199

The main selling point of the TTR girder stacking clamps is the fact that it enables girders to be transported and stacked horizontally. These are ideal for use by steel stockholders and steel fabricators. Once offered up to the vertical flange of the girder, they are locked in place by the jaw locking lever.

The design allows the Clamp to be used individually, however for longer girders they should be used in pairs in conjunction with a spreader beam.

*Per clamp. - Please contact our sales team for full technical drawings.

## TTG 'horizontal flange' cirder stacking clamps

The TTG girder clamps are designed for transporting girders in the ' l ' configuration / position (see photograph on the right).

These are ideal for use by steel stockholders and steel fabricators. Once offered up to the horizontal flange of the girder they are locked in place by the jaw locking lever.

The design allows the clamp to be used individually, however for longer girders they should be used in pairs in conjunction with a spreader beam.

## TPM PERMAMENT LIFTING MAGNETS

TPM permanent lifting magnets are ideal tools for easy, quick and economical transport of heavy objects made from ferro-magnetic material. Typical operating areas are workshops and warehouses, loading and unloading of machines as well as construction of jigs and fixtures.

[^22]
## CR single rall clamps

## Rail grab with safety lock WLL 1000-2000kg

The CR rail clamps are designed to lift single rails securely and safely.

The clamps are designed to fit most types of rail section currently in use. The clamps have a narrow profile to enable attachment to an individual rail when rails are side by side.

The clamps are locked onto the rail-head via a lever operated spring mechanism. It is recommended to use clamps suspended from a lifting beam for long rail lengths.

Clamps can be supplied with a short length of chain and lifting eye as shown in the illustration. This MUST be specified at the time of order.

Typical application shot above showing a CR1000 in use with a Yale D85 Pul-lift and an 'Ironman' or right attached to YaleErgo 360 Ratchet Lever Hoist

| MR7 | 7 | 7000 | 180 | £5820.59 |
| MR8 | 8 | 8000 | 204 | £6033.49 |

*Per grab. - Please advise rail section when ordering.
The MR Multi-rail grabs have been designed to facilitate the fast bulk handling of a specific rail section (details to be advised at time of order).

Rails are locked onto the clamp by swivelling toes that locate under the rail-head and top clamp body that rotates in a cam action, pressing a hard rubber lined horizontal beam onto the top of the rail-head. The rubber lined contact beam prevents marking or damage to the rail-head.

Two clamps are recommended at centres of $50 \%$ to $60 \%$ of rail length for rails up to 20 mtr long. For rails longer than 20 mtr , three clamps at centre distance between outer clamps of $65 \%$ to $75 \%$ of rail length must be used. (NB. Clamp must be within rated WLL).

Rails to be lifted must be stacked with bottom flange toes touching. All rails must be of the same rail section size.

The master link used is ref: A8W26 (100mm x 180mm)

The MRC Multi-rail grabs have been designed to facilitate the fast bulk handling of rail sections.

The features and applications of the MRC Multi-rail grabs are similar to that of the MR Multi-rail grabs but with the added benefit of having interchangeable, modular designed comb sections. Various combs sections to suit specific rails can be combined with the same scissor mechanism. Additional comb sections can be purchased separately. Please contact our sales team for further details.

An further option on the MRC is that it can be fitted with an automatic open / close device that engages the rail sections when the clamp is lifted from the rest
 position.

## PP pile pulling clamps

* Shackle NOT included on PP clamps.

The PP pile pulling clamps are designed to pull out driven piles or trench shielding. The clamps have a narrow opening and a deep slot to ensure that the pile is gripped firmly. It is extremely difficult to determine the forces required to pull out driven piles so it is recommended that a load indicator is used to ensure the WLL of the clamp is not exceeded.

The PP clamp is supplied as standard with a double locking mechanism to ensure that the clamp remains 'locked on' and cannot become unlocked during the extraction of the pile.

| Model | UL <br> kg | Jaw capacity <br> mm | Throat depth <br> mm | Weight <br> kg | Price <br> $£$ |

## OP pILE PITCHING clamps

The CP pile pitching clamps are specifically designed for pitching sheet steel piling. These clamps come fitted with a 15 metre length of rope which allows the clamp to be released from the ground. The clamp comes fitted as standard with a shackle.

NB: These clamps are NOT designed for extracting driven piles.
*
Spare parts for the CP pile pitching clamps are shown on page 198

## PI PIPE HOOKS

The PH pipe hooks are used in pairs for the safe transport of pipes. The shackles are included with the hooks.

PH for $60^{\circ}-90^{\circ}$ top angle between chains:

## *Per pair.

## TPZ BOARD CLAMPS

TPZ board clamps offer a simple and effective way to vertically lift and transport a variety of materials such as wood, MDF, plasterboard, stone, and plastics. The clamp has been designed with large rubber pads to minimise damage to loads and the handle enables the operator to guide the load easily during operation.

| Model | WLL <br> $\mathrm{kg}^{\star}$ | Jaw capacity <br> mm | Weight <br> $\mathrm{kg}^{\star}$ | Price <br> $£^{\star}$ |

*Per clamp. - Please contact our sales team for full technical drawings.

## HEC HAND GRIP Clamps

The HGC hand grip clamps are suited for the individual transportation of light and thin materials. They have a jaw capacity of up to 10 mm , and can lift up to 250 kgs .

To operate the clamp you simply press down on the hand grip which compresses a spring. This allows the clamp to open and you simply slide the clamp on to the material to be lifted.

| Model | Type / option | WLL kg* | Jaw capacity mm | Weight kg* | Price $£^{*}$ |

*Per clamp. - Please contact our sales team for full technical drawings.
$E X=$ Extended handle ( 300 mm ). EB=Eye bolt (instead of handle).
Opening \& closing

## TS2 'TWO WAY' SEREW CLAMPS

The TIGRIP TSZ 'two way' screw clamps offers many possible uses. Ideally suited for the construction industry. The unique design of the spindle makes it easy to attach to 'angle' plate. This is achieved by simply turning the handle which applies the pressure to the plate holding it securely. Two lifting points enable it to be pulled in two different directions.

| Model | WLL <br> $\mathrm{kg}^{*}$ | Jaw capacity <br> mm | Weight <br> $\mathrm{kg}^{*}$ | Price <br> $£^{*}$ |
| :---: | :---: | :---: | :---: | :---: |

| TSZ 5000 | 5000 | $0-40$ | 16 | $\mathbf{£ 9 4 3 . 3 4}$ |
| TSZ 7500 | 7500 | $0-40$ | 21 | $\mathbf{£ 1 0 5 3 . 6 2}$ |

## *Per clamp.

NB. Surface of material to be lifted must not exceed a hardness level of HRC 50/Brinell 480

## TSH 'SWIVEL HOOK' SEREW CLAMPS

The TIGRIP TSH 'swivel hook' screw clamps is suitable for many applications. It is particularly useful for lifting and pulling sheet metal, girders, and steel constructions. The clamps are supplied complete with an alloy safety shackle that allows for pulling at $180^{\circ}$ degrees.

| Model | WLL <br> $\mathrm{kg}^{\star}$ | Jaw capacity <br> mm | Weight <br> $\mathrm{kg}^{\star}$ | Price <br> $£^{\star}$ |

## TKLH-VIS' 'SELF WEICHT' balange crane foris

The TIGRIP TKG-VHS range of crane forks are equipped with adjustable tines, adjustable mast height and a self weight balancing system. Crane forks with self weight balancing* tend to point their tines upwards when being transported, this prevents the load from unintentionally slipping off the tines.

The self weight balancing mechanism returns the lifting point to the unloaded position when the load is set down. For efficient operation of this mechanism the load must be greater than $20 \%$ of the working load limit.

*NB: The automatic balancing system requires a minimum
load of $20 \%$ of the crane forks working load limit.

| Model | WLL* kg | Adjustment of tines (A) mm | Useable height (B) mm | Length of tines (C) mm | Section of tines (D) mm | $\begin{aligned} & \text { Overall } \\ & \text { height (E) } \\ & \mathrm{mm} \end{aligned}$ | Weight <br> kg | Price <br> £ |

## DEFOO DRUM CLAMP

The DC500 drum clamp has been designed to lift and transport steel drums. If moving empty or sealed drums then one clamp is sufficient. Should you be lifting an open full drum, then two clamps should be used with a two leg chain sling.

This clamp is extremely light weight and very quick and easy to use.

| Model | WLL <br> $\mathrm{kg}^{\star}$ | A <br> mm | B <br> mm | C <br> mm | Dm | E <br> mm | Fm <br> mm | G <br> mm | Hm | Weight <br> $\mathrm{kg}^{\star}$ | Price <br> $£^{\star}$ |

*Per clamp. NB: For use with STEEL DRUMS only.

## DCV500 verticallift drum clamp

The DCV500 drum clamp has been designed to lift and transport steel drums in the vertical position. One clamp can be used to lift drums with or without their lids by gripping the rim of the drum.

Its light weight and small overall design makes it ideal for picking up drums that sit tightly on pallets. The centre of gravity of the drum is below the lifting point during transportation.

The DVC500 is also available with a 'lock on / open latch'. Please contact the Camlok sales team for further details.

NB: For use with STEEL DRUMS only.

| Model | WLL <br> kg | A <br> mm | B <br> mm | C <br> mm | D <br> mm | E <br> mm | Weight <br> kg | Price <br> $£$ |

| DAF | 350 | 420-700 | 6.0 | £521.90 |

## TRU round stock grabs

## TRU round stock grabs <br> Working load limit (WLL) 100-4000kg

The TRU round stock grabs are designed to pick up tubes, pipes, rolls or similar round stock material with a diameter of up to 300 mm . They are extremely easy and simple to use and make for safe lifting.

## Options:

- Jaws can be fitted with plastic pads or rubber lining to minimise marking of surfaces.

NB: When using the protective lining, it is important that the surfaces are dry, clean and free of oil and grease.

|  |  |  | Manual latch |  |  |

*NB: When fitted with rubber lining jaw capacity will be reduced by approx 4mm.

## TBG/TST block grabs

## TBG/TST block grabs

Working load limit (WLL) 200-1000kg

These block grabs are designed to transport any material with parallel surfaces that can withstand a clamping pressure twice as high as the weight of the load being lifted. The range offers jaw capacities from 0-1100mm. They are extremely easy and simple to use and make for safe lifting. The TBG has rubber lined jaws and the TST model has serrated steel jaws.

NB: When using the models fitted with rubber pads, it is important that the surfaces are dry, clean and free of oil and grease.

## TCK 'SINGIE ARW' C-HOOKs

The Camlok TCK C-Hooks have been designed to safely and efficiently handle coils, rolls, rings, pipes, round stock and other similar loads.

Many features are available on C-hooks. When lifting collared or standard pipes, the optional backstop device can be positioned as far back as possible. If the lifting of shorter pipes is required the backstop can be adjusted accordingly. Loads that are longer, or exceed the specified working load limit, should not be lifted. Camlok uses the latest 3D CAD design technology to produce bespoke products tailored to customer requirements. There are many additional options available including shaped tines and adjustable end-stops.

Load details: The more information you can provide the quicker a quote can be prepared. Please provide the Width (A) x Outside Dia. (B) x Inside Dia. (C)

## TRS 'UNIVERSAL' TURNING HOOKS

The TCS coil turning hooks are specifically designed to pick up coils of steel or banding material which are laying flat.

Once the turning hook is positioned and the crane hook is raised, the coil automatically transfers from the horizontal position to the vertical position. This allows for easy transportation and also allows for loading onto machines or racking.

(3)

Continue hoisting and traversing the crane until the coil is vertical. Take special care when the pivot point is below the cog of the coil, as the coil will topple back into the hook. If thin coils are lifted, then place the coil down on its edge and move the coil to the rear of the hook for transporting. rises from the ground.

## CLB/CLT contalner lifting lugs

## CLB for bottom/side lifting CLT for top lifting

## Working load limit* (WLL) 32000-56000kg

These container lifting lugs are supplied, and used, in sets of 4. They have a total lifting capacity of up to 56 tonne. The CLB and CLT lugs serve as flexible lashing points for the transportation of containers.

Two types are available dependant upon where you want to fasten them; to the side or the top of the container.

The CLB model is mounted horizontally to the side of the container at either the top or the bottom fixing holes. This model has a spring loaded bolt to prevent accidental release.

The CLT type is vertically mounted in the hole at the top of the container and is locked into place by simply turning the lug $90^{\circ}$. This configuration allows for transportation via the use of a lifting frame in conjunction with cables, chains or slings.

NB. NOT TO BE USED ON A 4 LEG CHAIN SLING.

## TTB big 'bulk' bag lifter

The TTB big bag lifter is designed to lift and transport standard large bulk bags safely and securely. It is manufactured as a 4 point spreader beam in a fixed frame. The construction incorporates 4 hooks with safety latches that allow fast loading and unloading.

| Model | Article <br> No | WLL <br> kg | Width (Z) <br> mm | B <br> mm | C <br> mm | D <br> mm | Weight <br> kg | Price <br> $£$ |

## FLTH adustable 'uual' Tiwe hooks

The FLTH tine hook is designed to convert your forklift
 truck into a crane. This is done by simply sliding the FLTH over the tines of your forklift truck and then fastening the tines by tightening the two threaded bars underneath.The unit is supplied as standard with a swivel safety hook.

| Model | WLL <br> kg | Max. fork size <br> mm | Weight <br> kg | Price <br> $£$ |
| :---: | :---: | :---: | :---: | :---: |

| FLTH 3 | 3000 | $120 \times 60$ | 37 | $\mathbf{£ 7 2 8 . 2 5}$ |

## TZH ADUSTABIE 'SIMGIE TINE HOOKS

The TZH tine hook is designed to convert your forklift truck into a crane. This is done
by simply sliding the TZH onto a single tine. The tine hook is fastened to the tine by tightening the two threaded bars on either side. The unit is supplied as standard with a swivel safety hook.

| Model | WLL <br> kgs | Fork width <br> mm | Max. fork height <br> mm | Weight <br> kgs | Price <br> $£$ |

## SL sheariegs

The Camlok Shearlegs have been designed to be simple, easy to erect and operate. Each set of shearlegs are supplied fitted with safety chains and a large eyebolt for the suspension of hand operated lifting devices

NB: These shearlegs must not be used for lifting personnel. Height Safety Tripods are available on page 53.

| Model | WLL <br> kgs | A <br> mm | B <br> mm | E <br> mm | Weight <br> kgs | 'Spike' <br> $£$ | 'Flat' <br> $£$ |

Camlok Shearlegs are supplied as standard with spiked feet but are available with a rubber lined flat feet. Please specify at time of order.

## CAMLOK SAFETY vertical plate clamps

## RIGHT <br> FOR LIFTING LONG PLATES <br> TWO CLAMPS AND A LIFTING BEAM MUST BE USED

Plate at full depth and lever in locked position.

Chipped teeth are only acceptable if the chip is less than half the width of the tooth and the adjoining teeth are undamaged.
*Wear width: See clamp operating instructions.

## RIGHT FOR LIFTING SHORT LENGTH PLATES A SINGLE CLAMP CAN BE USED

- Always read operating instructions before use.
- Plate must be free from grease, liquids, scale or paint.
- Always check the operation of the clamp before use.
- Never use damaged or worn clamps. Report damaged equipment to the relevant person.

## RIGHT

FOR TURNING OVER PLATES PLate must be in contact with back of clamp

- Check operating of the clamp before use.
- Stand clear during lifting and lowering.
- Clamp can be attached to plate either way up.
- Fit clamp above centre of gravity.

If locking lever is uppermost it is necessary to lift the clamp when sliding onto the plate to allow free movement of the jaw.
to allow free movement of the jaw.

[^25]
## CAMLOK SAFETY hORIZONTAI / GIRDER / SEREWLOK Clamps

## GTRDER / SEGTION GLAMPS

CG, TTR \& TTG CLAMPS

Always ensure the clamp is fitted correctly before attempting a lift.

Use on small sections.
Jaw in contact
with sufficient surface area to grip load safety.

Front of clamp in contact with load.

For long girders use 2 clamps and a lifting beam.

For short sections one clamp may be used.

SGREWLOK BEAM GLAMPS

Please visit our resource library at: www.camlok.co.uk for operating manuals and technical data.

## LB wire rope winches

## Capacities: 150-1200kg (up to 900kg in stainless steel)

Originally developed as an off-road winch, the console-mounted winch model LB is used today for a variety of lifting and pulling applications. The LB is our best-selling range of winches designed for maximum versatility \& efficiency.

## Features and benefits include:

- Options include:
- free-wheeling device for a quick manual unrolling of the unloaded rope.
- variable cranks
- stainless steel version for increased corrosion protection.
- Very lightweight design.
- Fitted with load pressure brake to prevent unintentional lowering of load.
- High efficiency obtained by spur gears.
- Column or base-mounting.

- All Pfaff winches are supplied WITHOUT wire rope.

## IIW-F/BS 'SPUR GEAR DRIVE' MANUAL WIRE ROPE WINCHES

## Spur gear drive, manual wire rope winch Model HW-C

## Capacities: 300-800 daN

## Features and benefits include:

- Winch housing and rope drum from robust steel plate for high versatility.
- Rope drum on bush bearings for flawless rope lead-off.
- Spur gear drive for optimal efficiency.
- Compact design.
- Easy and quick mounting onto walls, poles, towers etc.
- Pivotable handle.
- Automatic load pressure brake for safe holding and extremely sensitive lowering of the load. Unintentional brake release is prevented even with swinging loads.
- The wire rope winch comes with a high visibility, yellow powder coated finish as standard.
- Suitable for operation in ambient temperatures of $-10^{\circ}$ to $+50^{\circ}$

Applications:
Suitable for use in areas where electricity is not available or where electric appliances can not be safely operated on account of water, mud or dirt.

SW-W wall-mounted, wire rope winches
Capacities: 125-750kg

Robust and well-designed, the SW-W is well-suited to industrial and plant construction, agriculture and wholesale applications.

## Features and benefits include:

- External braked safety crank for 300 kg to 750 kg units.
- Removeable hand crank on 125 kg unit.
- Aluminium body on 125 kg unit.
- Heavy duty steel body for 300 kg to 750 kg units.

## SW-K LAMBDA wire rope wiwches

## SW-K LAMBDA, wire rope winches to BGV C1 Capacity: 300kg

Strong, durable winch designed specially for safely moving loads above people. Conforms to German Safety Standard BGV C1 and is ideal for use in theatres, studios and warehouses.

## Features and benefits include:

- Grooved drum.
- Spring loading rope pressure drum for improved one layer rope coiling.
- Safety spring double brake system automatically holds load.
- Multiple cable grooved drum available as optional extra.

## SW-K GAMMA ‘ALUMINIUM' HAND WINGHES

## SW-K GAMMA, aluminium hand winches

 Capacities: 200-800kgThese models are the solution to many winching problems. The design features two-speed gearing on some models with very fast operation. The two speeds are available depending upon the capacity; for example on the 500 kg winch the fast speed winds in 335 mm for each turn of the crank with loads below 90kgs, whilst the slow speed lifts full loads with minimum effort.

## Features and benefits include:

- Aluminium construction.
- Teflon coated bearings to reduce effort with a roller chain drive.
- Automatic self-sustaining spring loaded brake acting in both directions.
- Base, wall or ceiling mounting.
- Removeable handle, operates from both ends of the winch.

SW-K GAMMA - 500kg
*Recommended wire rope DIN 3060 FE-znK-1770 sZ spa. **Low/high-speed.

- All Pfaff winches are supplied WITHOUT wire rope.

## MWS, Manual winch with spur gear drive Capacities: 150-1500kg

For use where no electricity is available or in a dirty environment.

## Features and benefits include:

- Enclosed gear drive for protection of internal parts, even under tough working conditions.
- Spur gears on roller bearings, rope drum on plain bearings.
- Easy and quick mounting onto walls, poles etc.
- They have a self-locking, anti-kickback and adjustable crank handle for fast lifting of smaller loads, resulting in lowest possible handle effort and rapid winding of the rope.
- Automatic load pressure brake for safe holding and extremely sensitive lowering of the load. Unintentional brake release is prevented even with swinging loads.
- They are suitable for operation in ambient temperatures of $-20^{\circ} \mathrm{C}$ up to $+40^{\circ} \mathrm{C}$.

## SW-W-SHO WALL-MOUNTED' WIRE ROPE WINCHES [WE]

## SW-W-SGO, wall-mounted wire rope winches with worm gear drive Capacities: 250-5000kg

Heavy-duty wire rope winch suitable for use in areas where electricity isn't available or where electrical appliances can not be safely operated.

Can also act as a reliable manual back-up for a powered appliance. Ideal for use in theatres, sports halls and a multitude of industrial applications.

## Features and benefits include:

- 2 lifting speeds on 2000kg+ models.
- Compact design, robust fabricated steel frame, suitable for wall-mounting.
- Machine-cut worm wheel \& shaft, mounted bearings \& worm gear drive.
- Lots of optional extras available including multi-compartment drums, grooved drums, free drum-spooling device, controlled free spooling, air motor and zinc-plated.

NB. Corrosion resistant versions are also available. Please call the Pfaff sales team for further details.

## S20/S24 hand operated gearbokes

## Model: S20

With cast iron housing mounted into a rolled section fixing bracket. With machined worm wheel and hardened worm shaft running on bronze bushes.

## Model: S24

With diecast aluminium housing suitable for use in hostile environments. Machined Phosphor Bronze worm wheel and hardened worm shaft fitted with teflon sintered bearings to reduce effort.

## EC 'Standard' Fololing encine crane

## Engine Crane

The EC Steerman engine crane features welded construction with rugged reinforced tubular steel.

The special hydraulic long rams are equipped with a patented built-in by-pass mechanism. The innovative design allows it to be quickly folded away for very easy transportation.

Ready to despatch straight off the shelf.

## DSRB S Sheave blocks

## Wire rope sheave block for BETA PROLINE and SILVERLINE winches

Guiding with DSRB S wire rope sheave blocks for BETA PROLINE and SILVERLINE manual and electric rope winches. The dynamic all-rounder with variable rope and sheave diameters and cable deflections of up to $180^{\circ}$ can move loads of up to 8 tonne with ease and absolute reliability. Typical for Pfaff is the high standard of quality: With a sheave block for manual and powered operation, equipped with grease-filled, sealed ball-bearings as standard. A carefully coordinated system of application-specific cable diameters and matching turned precision cable groove ensures that the unit is also wear-free.

## DSR S sheaves

Pfaff's wire rope pulleys are available in a wide variety of sheave diameters from 145 mm up to 490 mm and wire rope diameters from 6 mm to 18 mm .

## Features and benefits include:

- Wear resistant rope guide.
- Made from high quality steel.
- Bearings fitted as standard.
- Operating temperature $-20^{\circ}$ to $+40^{\circ}$

*Cable with higher breaking strength for wire rope winch LB 1200kg.

Additional accessories available on request:

- Cable suspension gear (1 to 4-strand)
- Sling ropes with loops at both ends
- Wire rope sheave block with plastic sheave

Wire cable blocks with hooks and swivel eyes

- Hinged wire cable blocks

## BETA SL ELECTRIC WIRE ROPE WINCHES

## BETA SL Electric winches <br> Capacities: 250-2000kg

Short delivery timems are followed by long periods in operation: the electric wire rope winch BETA SL in its standard design works permanently reliably due to enclosed worm gear pairs or spur gears with high-quality brake motors.

The electric wire rope winches BETA SL are available with a contactor control system including a gear limit switch.

## Features and benefits include:

- Maintenance-free worm gear pairs or low-maintenance spur gear with milled and ground gears - running in an oil bath
- Very quiet running by diagonal interlock
- Electrically released spring-applied disc brake
- According to the accident prevention provisions BGV D8
- Range of temperature: $-20^{\circ} \mathrm{C}-+40^{\circ} \mathrm{C}$
- Powerful three-phase motor for multi-range voltage $380-420 \mathrm{~V} / 50 \mathrm{~Hz}$ or $440-460 \mathrm{~V} / 60 \mathrm{~Hz}$
- Electronic overload protection on units over 1000 kg
- Range of temperature: $-20^{\circ} \mathrm{C}-+40^{\circ} \mathrm{C}$
- Duty ratio S3-40\%
- Motor protection type IP55
- Grooved rope drum
- Large wire rope capacity
- Contactor control 42V
- Gear limit switch

Option: pressure roller

Option: slack rope switch

Option: control pendant

Option: frequency converter

## BETA EL Electric winches Capacities: 320-7500kg

These robust and elegant electric wire rope winches BETA EL are used
for lifting, lowering and pulling all types of loads in all applications.
The proven technology and the high quality standard of the electric wire rope winch BETA EL guarantee trouble-free, reliable and durable operation.

The construction kit system permits high flexibility: the electric wire rope winches BETA EL with their many options can be combined very well into an individual solution. The use of high-quality components offers safety and long service lives.

## Features and benefits include:

- Maintenance-free worm gear pairs or low-maintenance spur gear with milled and ground gears - running in oil bath
- Very quiet running by diagonal interlock
- Electrically released spring-applied disc brake
- Duty ratio S3-40\%
- Contactor control 42 V
- Range of temperature: $-20^{\circ} \mathrm{C}-+40^{\circ} \mathrm{C}$
- Powerful three-phase motor for multi-range voltage
- $380-420 \mathrm{~V} / 50 \mathrm{~Hz}$ or $440-460 \mathrm{~V} / 60 \mathrm{~Hz}$
- Motor protection type IP55
- Grooved wire rope drum
- Large wire rope capacity
- 2 rope fasteners for variable rope direction
- Modular construction system with many versions
- Electronic overload protection std. on capacities over 1000kg

According to the accident prevention provisions BGV D8

For determining the required rope length, please take into account that at least 2 to 3 windings must remain on the drum!

ATEX
Protection classification See pages 18 \& 19

22
Please contact the sales team and ask for our Beta EL Winch Questionnaire which must be filled in to enable us to provide you a quotation

In compliance with accident prevention regulations BGV C1, also available for application on stages and in studios.

## Options:

- External operation via control pendant / radio

Gear limit switch, adjustable

- Slack rope switch
- Rope pressure roller
- Special wire rope drums for multi-rope operation

Drum extensions for higher stroke travel

- Special preservation
- Other operating voltages available

1 Other motor protection types

- Absolute and incremental encoders
- Control with frequency converter for continuously adjustable variable speeds

[^26]- All Pfaff winches are supplied WITHOUT wire rope.

## OMEGA manual wire rope winches

## OMEGA Manual wire rope winches

Developed for special challenges: the OMEGA manual wire rope winch offers perfect functional safety in areas such as the ATEX (explosion protection) or off shore ones. The OMEGA BGV D8 and OMEGA OFFSHORE versions are prepared for manual operation and operation via an external motor-powered drive.

OMEGA BGV D8

- Carrying loads 1000 kg

## OMEGA Offshore

- Carrying loads 800 kg

External motorized drive possible

## OMEGA ATEX

- Carrying loads 1000 kg
- Used in potentially explosive atmospheres requiring a high level of safety.

## Standard equipment

- Removable hand crank
- Encapsulated gearbox - running in oil bath
- High-quality painting to improve corrosion protection

[^27]
## CALCULATING WINGH LIFTING CAPABILITIES

Since the rope is continuous, from the drum to the attachment point, the load is always 1 tonne, no matter where measured. The head load is the number of line attachments at the head sheave $\times 1$ tonne. All loads shown ignore frictional losses in the system.

DRIVE GROUP TO DIN 15020 - PART 1

| RUNNING TIME CATAGORY <br> Running time per day in hrs related to one year | LIGHT <br> Max load occurs only infrequently | MEDIUM <br> Low, average. Max. load occurs with roughly equal frequency | HEAVY <br> Max. load occurs almost continuously |
| :---: | :---: | :---: | :---: |
| V006 up to 0.125 | 1Em | 1 Em | 1Dm |
| V012 up to 0.125 | 1Em | 1Dm | 1 Cm |
| V025 up to 0.125 | 1Dm | 1 Cm | 1 Bm |
| V05 up to 0.125 | 1 Cm | 1 Bm | 1Am |
| V1 up to 0.125 | 1Bm | 1Am | 2 m |
| V2 up to 0.125 | 1Am | 2 m | 3 m |
| V3 up to 0.125 | 2 m | 3 m | 4 m |
| V4 up to 0.125 | 3 m | 4 m | 5 m |
| V5 up to 0.125 | 4 m | 5 m | 5 m |

If the duration of an operating cycle is 12 minutes or longer, the rope may be graded once drive group lower than the drive group grading determined from the running time catagory and from the load collective.

## FLEET ANGLE / SLOPES / RESISTANCE

## - Calculating the fleet angle

Minimum distance from drum to first sheave or load connection - M.

## - Slope \& grade resistance

| GRADE <br> Percent per 100 <br> horizontal feet | RESISTANCE <br> kg pull per tonne to <br> overcome resistance | GRADE <br> Percent per 100 <br> horizontal feet | RESISTANCE <br> kg pull per tonne to <br> overcome resistance |

Double coated chrome piston with high quality seals reduce effort at maximum load

## Pfaff-Silberblau Hand pallet trucks "Designed for the hire industry!"

Pfaff's range of hand pallet trucks have gained an enviable reputation for strength, quality \& durability. They are recognised and proven within the hire industry as the number one truck.

All Pfaff trucks have a high-quality epoxy coating, a comfortable ergonomic handle which can be turned on $210^{\circ}$ to both sides and can be supplied with varied steering / load wheel combinations.

We can offer two fork widths in our Silverline (best seller) ranges to suit both the standard Euro and GKN pallet sizes.

## Features and benefits include:

- Smooth and quiet motion due to the use of rubber rollers.
- Easy handling as the handle is released from the hydraulic system to the neutral position.
- Precisely adjustable pressure control valve to prevent damage from overloading.
- One-hand control for controlling all functions such as lifting, transporting and lowering.
- Ergonomic handlebar.
- Specially hardened axles, maintenance-free bearings and hard chrome-plated piston rods.
- Precision lowering valve to enable you to adjust the lowering speed to your requirements.

## EGU $15 E$ LII-ION electric pallet truck

## EGU 15E Li-ION electric pallet truck Lifting capacity 1500 kg

Ideal for internal transport of palletised goods on even ground, covering short to medium distances. The EGU $15 E$ is the new generation of electric pallet trucks. With its compact dimensions and new Lithium battery, it is an ideal alternative to the standard pallet truck and, with only 123 kg service weight the perfect driving device on a truck.

Supplied as standard with a replaceable battery the discharged battery can be exchanged with a fully charged battery within seconds, minimising the amount of disruption to the work cycle. Charging time for the battery is only 2.5 hours.

Features and benefits include:

- Maintenance-free rechargeable Lithium battery.
- Integrated Battery management system controls all important parameters and performance of the lithium battery.
- Charging time of only 2.5 hours, intermediate charge is possible.
- Integrated PIN code panel with LCD display.
- Curtis-Controller and CAN-Bus technology.
- Infinitely variable driving speed.
- External battery charger for charging with a 230 V plug socket.
- Battery charge indicator and operating hour counter.
- Entry rollers ensure smooth entry into bottom-boarded pallets.

*Polyurethane.

## EOU PS 14 eleetric pallet trucks

## EGU PS 14, 'Heavy duty’ electric pallet truck Capacities: 1400kg

Pfaff offer a range of multi-purpose, heavy duty, electric pallet trucks for professional lifting tasks up to 1400 kg . These units are robustly constructed, comfortable to drive and steer, and can operate in tight spaces given their compact housing chassis. The EGU PS 14 range really is designed for the professional user and is ideal for working on ramps and for loading/unloadingcontainer lorrys.

EGU PS 14 Basic - Entry level model with DC traction motor.
EGU PS 14 Plus - Uses the maintenance friendly AC traction motor for longer working periods. EGU PS 14 Li-ION - Uses Li-ION battery which has a lifespan of up to 3000 charging cycles.

## Features and benefits include:

- Multifunctional control handle for easy handling. The electic pallet lift truck will automatically be slowed down if the control handle in the operators hand.
- Impulse control for steppess regulation of driving speed.
- Slow moving function at upright handle position for the use in confined spaces.
- Battery size depends on the type of application.
- Anti-crush safety device on handle.

All prices shown below are INCLUSIVE of battery and battery charger.

## EGU PSL II Penestrian electric drive stackers

## Capacity: 1200kg, fork height max. 3500mm

## Features and benefits include:

- The wide mast and the laterally, ergonomic tiller ensure a free view onto the goods as in front of the stacker.
- All functions are comfortably controlled from the tiller head.

The reduced overall width of 800 mm improves the handling of goods in narrow spaces and corridors.

- Ultra-slow drive function enables exact driving in very tight spaces.

Easy maintenance - the convenient access opening at the bottom of the forklift allows an immediate disassembly of motor wheel without lifting the machine.
$\square$ Improved drive and lifting speed.

- The spiral charging cable which can be stored in the chassis enables easy charging at every socket.

Supplied complete with 24v/85Ah batteries and charger, as standard. Semi traction battery available as optional extra.

## PRAKTIKUS IIP trolley lift

## Capacity: 400kg

Simple, lightweight and sturdy trolley lift offering a chrome-plated chassis, 2 fixed and 2 steering rollers and a wheel brake. In addition, the HP offers a hydraulic foot pump enabling smooth control of loads, enhanced by a hand-wheel operated valve.

A versatile and reliable unit for use in workshops, warehousing and packing environments.

## HK scissor lift tables

## HX 150, HX 300, HX 500, HX 750 and HX-D 0350

 scissor lift tablesCapacities: 150-750kg

Workshop platform with adjustable height, suitable for all manufacturing, packing and workshop applications.

## Features and benefits include:

$\square$ Five models offering 150-750kg lifting capacities and 220-1000mm lift heights.

- Hydraulic foot pumps lift the table with minimal effort.
- Hand-wheel operated hydraulic valve precisely and safely lowers load.
- Lockable wheel feature for added stability and safety
- HX-D 0350 offers double-scissor feature.
- HX-D 0350 has greater lifting potential, up to 1.3 mtr .

Note: Lowering action is via a cable rather than knob shown in photographs.

HX 150, HX 300, HX 500 and HX 750

HX-D 0350

HX-D 350

*Polyurethane (PUR).

## Scissor pallet truck with manual-hydraulic lift or electric-hydraulic lift option

## Capacity: 1000kg Fork height: 800mm

A combination of hand pallet truck and elevating platform for the transport and raising of palletised loads to various departments. Manual and electric options are available.

HU HS 10 B (Manual/hydraulic lift) features:
$\square$ Safety control handle with the functions:

- Quick lift - lifting - lowering -
- Lowering speed can be finely metered for sensitive lowering of the load.
- One-stage hydraulic for increased robustness.

Quick lift for loads up to 250kg.

- Overload protection by pressure relief valve.

1 Safety supports guarantee sure standing when the forks are raised.

- Low noise and smooth running with standard tyres: steer rollers and load rollers - polyurethane.

## HU ES 10 B (Electric/hydraulic lift) features:

- Increases the usefulness of the HU HS 10 A by saving operating time for demanding applications with frequent lifting and lowering operations.

Ergonomic control button for the hydraulic unit fitted in the handle.

$\square$In the case of battery failure the manual use of lifting and lowering is still guaranteed.
Quick electric-hydraulic lifting of the load, pressure relief valve protects against overloading.

- Low noise and smooth running due to polyurethane steering and load rollers as standard.
Additional tilting protection for the load rollers.
Comes complete with battery and battery charger.

## ZWW-L / ZWW wall mounted rack and pinion irgidictilis

## ZWW-L / ZWW, wall-mounted rack and pinion jacks Capacities: 300-10000kg

Wall-mounted rack and pinion jacks are used for lifting, lowering, pulling and pushing of loads.

## Features and benefits include:

- Robust steel design with precisely machined worm and spur gears for smooth and easy manual operation.
- Solid steel rack with additional bore hole for fastening of the load.
- Low wear owing to hardened gearing parts and precisely machined teeth.
- Suitable for a lifting load of up to 1200 kg for pushing and pulling loads.
- Rigid wall mounting.

## Options

## - Rack extensions

- Special fastening arrangements for shaft and rack
- Improved corrosion protection owing to zinc-plating.
- With folding handle.

## SOH-W sluice cate jacis

## SCH-W, sluice gate jack systems with rack and pinion drive Capacities 1500-10000kg

Sluice gate systems are used primarily in water power, agriculture and plant engineering.
Different crank types and layouts present hundreds of possible arrangements.

## Features and benefits include:

$\square$ Spring loaded safety crank provides pressure when required.

- 10000kg model supplied with a SIKU crank, others supplied with a SIFEKU crank.
- Slide lacquer treated racks.
- Spur gear with formed gearwheels.
$\square$ Precisely milled crank gear.
Options:
- Extended rack lengths.
- Galvanised finish.

[^31]1500-3000kg

Crank design

Spring loaded safety crank.

Spring loaded safety lock and plug-in crank.

## SIFEKU SAFETY RATCHET CRANKS

## Safety ratchet crank (SIFEKU)

Cast aluminium crank with folding handle. Spring operated load pressure brake is silent in operation and weather-resistant, no ratchet required. 250 mm radius for use on jacks up to 5000 kg capacity.

## Features and benefits include:

- Without pawl - silent in operation.
- Recoil proof.
- Maintenance free.
- Totally enclosed.
- Weather and temperature resistant.

Braking effect at both ends.

- At every height the load is securely held in the pushing and pulling direction

With folding handle.

| Article number | Square drive (mm) | Crank length (mm) | Weight (kg) | Price |
| :---: | :---: | :---: | :---: | :---: |
| 40004581 | 14 | 250 | 1.6 | $\mathbf{£ 1 2 0 . 1 0}$ |
| 40003433 | 17 | 250 | 1.6 | $\mathbf{£ 1 1 3 . 5 5}$ |

## SIKU safety ratchet cranks

## Safety ratchet crank (SIKU)

This crank is used with a double acting pawl assembly and is suitable for indoor applications. The crank is of cast steel with folding handle and incorporates two conical nylon or brass brake discs, dependant on duty, which act as a friction brake. Two versions are available: 14 mm or 17 mm square hole.

## Features and benefits include:

With one-sided braking effect.

- The load is held securely at every height.

With folding handle.

| Article number | Square drive (mm) | Crank length (mm) | Weight (kg) | Price |
| :---: | :---: | :---: | :---: | :---: |
| 40006026 | 14 | 250 | 1.2 | $\mathbf{£ 1 6 7 . 0 5}$ |
| 40005461 | 17 | 250 | 1.2 | $\mathbf{£ 1 1 6 7 . 0 5}$ |

## BAKU SAFETY RATCHET CRANKS

## Safety ratchet crank (RAKU)

Similar to the SIKU crank this unit has a selector unit which allows either the raise or lower positions to be selected. The crank can either be turned through $360^{\circ}$ (as the SIKU crank) or operated in short ratchet type movements which is especially suited for use in confined spaces. Two versions are available: 250 mm or 300 mm crank length.

## Features and benefits include

- The load is securely held at every height.
- Lift by moving the ratchet upwards and downwards.
- Adjust the lifting or lowering movement by moving a lever.

With folding handle.

| Article number | Square drive (mm) | Crank length (mm) | Weight (kg) | Price |
| :---: | :---: | :---: | :---: | :---: |

Note: Pawl NOT supplied with Ratchet Cranks as standard.

## STW-F 'pROLINE' STEEL JACKS IFIMED CLAWJ

## Steel jacks with FIXED lifting claw <br> Capacities: 1500-10000kg

Quality steel jacks used for lifting all types of loads across varying industries including ship repair, construction, maintenance and agriculture.

Load can be positioned on the head or the claw.
A very long service life is ensured via a robust steel housing and high quality spur gear, precise worked crank gear as well as additional worked pawl.

Pfaff steel jacks are supplied with SIKU braked safety crank fitted as standard. SIFEKU and RAKU cranks are available on request.

## STW-V steel jacks dadjustable claws

## Steel jacks with ADJUSTABLE lifting claw

Capacities: 3000-10000kg

Steel jacks with adjustable lifting claw designed for use in confined or tight areas. High quality spur gear and robust steel housing offer long service life.

The crank handle, in different executions, moves the jack shaft at the rack. The toe height of the claw can be adjusted to the required mounting or maintenance application.

Pfaff steel jacks are supplied with SIKU braked safety crank fitted as standard. SIFEKU and RAKU cranks are available on request.

## CPV \& CPV/F electric chaln hoists

## How to identify which model CPV or CPVF you have.

The Yale CPV / CPV/F electric chain hoist was launched in 2007. Since then, we have made various modifications to improve the performance and durability of the hoist. To help you identify the model you have we have put together the following guide. This will help you when it comes to ordering any spare parts for your repairs.

To ensure you choose the correct parts list, you must first identify your hoist. On the side of the body there is a silver foil label which provides the hoist data. The model will be shown at the top of the label and the serial number further down.

Model CPV denotes it is a single speed hoist and CPV/F denotes it is a dual speed hoist. Current models up to, and including, the CPV/F20-4 have the suffix ' NE ' at the end of the model code.

If you have any doubts please contact the sales team quoting the model and serial number.

Once you have identified which hoist you have please turn to the relevant pages shown below....

CPV/F 2-8
CPV/F 5-4

 operating Manual

If you have any doubts, regarding which hoist you have or which spare parts you may require, please contact the CMCO sales team direct on: 01244375375 quoting the model and serial number.

[^39]
## OPV \& EPV/F HOISTS mк1us mк2 us mкз

## Chain entry plate changes

MKI. Fitted to all 1st generation CPV hoists. This did not have brass inserts and you could see the microswitch buttons positioned opposite each other (a). If your hoist has this chain entry plate, and is a MKI hoist, then you need to order the complete upgrade kit shown below.

MKII. Plate thickness increased from 5 mm to 8 mm . Brass inserts fitted to activate the microswitches. You can see the brass buttons positioned opposite to each other (b). If your hoist has this chain entry plate, and is a MKII hoist, then you need to order the complete upgrade kit shown below.

MKIII. Internal changes to the chain guides - from plastic to metal. Microswitch mounting plate and orientation of the microswitch now positioned diagonally to each other (c). If your hoist has this chain entry plate, and is a MKIII hoist, then you can order individual replacement parts rather than the complete kit if preferred.

## Limit switch upgrade kit

To upgrade MKI or MKII hoists to the latest version please order the, easy to install, kit shown below. Once you have upgraded your hoist, any future parts can be ordered individually.

Please note: These individual parts are not compatible for MKI or MKII hoists on their own.

$\boldsymbol{\Omega}=$ Recommended spares if applicable.
NB: CMCO have a minimum order value of $£ 50$ net (exc. Carriage \& VAT).
NB: Any prices shown are per individual part.

## YKST - Adjustable chain stops

Yale chain stops have been developed for Yale hoists with round-section steel chains as additional protection against run through.

The two available sizes cover two different ranges of chain sizes. The load capacity indicated on the chain stop is the maximum working load limit (rated load) that must not be exceeded by the respective hoist used.

| Size | Suitable for chain mm/inch | Capacity WLL kg | Article no. | Price <br> £ |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 5.6-8mm | 1600 | 00100115 | $£ 69.52$ |
| 2 | 9-11mm | 3400 | 00100110 | £88.56 |
| 3 | $5 / 8{ }^{\prime \prime} \times 1 / 8$ " | 750 | 00100146 | £192.16 |
| 4 | $1 " \times 1 / 2^{\prime \prime}$ | 1500 | 00100143 | £135.39 |
| 5 | $11 / 4{ }^{\prime \prime}{ }^{1 / 8 / 8}{ }^{\prime \prime}$ | 3000-10000 | 00100156 | £248.94 |

## KKL - Chain claw

Yale chain claws have been developed specifically for us with Yale Utility hoists.

The two available sizes cover two different ranges of chain sizes. The load capacity indicated on the chain stop is the maximum working load limit (rated load) that must not be exceeded by the respective hoist used.

Although every effort is made to deliver your goods within the specified time, we cannot guarantee or be held responsible for deliveries being late or lost. Whilst we endeavour to offer 'next day' delivery on all items, please check with the sales team at time of order and specify your required date on your purchase order. Any orders placed stating ASAP or URGENT will normally go through on a 3-5 day delivery. To progress orders or to gain a P.O.D., please contact our sales team on: 01244375375.
Before signing delivery document. If upon delivery of consignment any item is damaged, not of correct quantity or does not comply with the description, please endorse the delivery document accordingly. Additionally, you must advise in writing both, the carrier and our offices within 3 working days. Regrettably, we can consider claims only if the above conditions are met.

- PLEASE NOTE THAT DUE TO THE LACK OF TRACEABILITY WE DO NOT SEND ANY ORDERS BY POST. WE ARE ALSO UNABLE TO SEND ITEMS VIA OUR CARRIER TO RESIDENTIAL ADDRESSES.

## CONDITIONS OF SALE

Columbus McKinnon Corporation Limited (hereafter called "The Company") draws attention to the following terms and conditions, which shall apply to all orders accepted and supplies made to the exclusion of any other terms and conditions whatsoever.

1. DELIVERY. Any delivery date given shall be subject to confirmation or revision by the Company at the time of acceptance of an order. The Company will then employ all reasonable means to make delivery within the time stated, but cannot accept any liability whatsoever for any loss or damage arising out of or in connection with late delivery or non-fulfilment of contract. The company shall be entitled to defer delivery until any monies due from stated, but cannot accept any liability whatsoever for any loss or damage arising out of or in connection with late delivery or non-fulfilment of contract. The company shall be entited to defer delivery untll any monies due from buyer has been received. The company shall also be entitled to make partial deliveries by installments and each installment shall constitute a separate agreement. Should delivery be delayed by the buyer's instructions or lack in obtaining materials or any other causes of similar character then a reasonable extension of time shall be granted.
2. PRICE. All prices quoted are exclusive of carriage, which will be charged separately unless otherwise stated and those ruling at the date of this quotation and subject to V.A.T. Any orders accepted by the Company shall be invoiced and paid for at the Company's prices ruling at the date of dispatch.
3. ACCEPTANCE OF ORDERS. Any quotation and acceptance thereof shall not constitute a contract to supply. The contract between the Company and the buyer shall only be formed when the buyer's order is formally accepted in writing by the Company.
4. ADDITIONS / MODIFICATIONS. No additions or modifications to these conditions of sale shall be deemed to have been accepted by the Company or form any part of any contract between the Company and the buyer unless the Company has first agreed in writing to such additions or modifications.
5. IMPROVEMENTS AND CHANGES. The Company reserves the right to make improvements or changes in the engineering specification of any goods without first referring to the buyer.
6. CANCELLATION. The buyer shall not be entitled to cancel any contract unless the Company has first agreed in writing to such cancellation. Any cancellation by the buyer will be subject to a cancellation charge, which will be determined by the Company and paid by the buyer as a precondition to the Company's acceptance of the buyer's cancellation.
7. SHORTAGES. The buyer shall be deemed to have accepted the quantity of goods delivered as being in accordance with the buyer's order unless within 7 days from receipt of the same the buyer has notified the Company in writing of any shortage.
8. TITLE AND RISK. Risk in the goods shall pass to the buyer at the time of despatch from the Company's works and the Company shall not be liable for any loss or damage whatsoever to the goods, which may occur after that time. Title in the goods shall remain with the Company until such time as full payment for the goods is made. Until such time, the Company shall be entitled to recover the goods or any part thereof. And for the purpose of exercising such rights the Company its employees and agents with appropriate transport may enter upon the buyer's premises and any other location where the goods are situated. Furthermore, if payment is not received and the buyer should be wound up or a receiver appointed over the whole or part of the buyers undertaking or an execution of distress levied against the buyer, the Company shall be entitled to enter and repossess the goods or trace the goods or the proceeds of sale in your hands or in the hands of any liquidator or receiver.
9. TERMS OF PAYMENT. Unless otherwise agreed by the Company in writing, all invoices must be paid without retention or set-off, on or before the last day of the calendar month following the month in which they were invoiced or as stated in the Company's quotation. Failure to pay the full amount due will entitle the company without notice and without prejudice to its other rights, to refuse to effect delivery or allow collection by any agen of the buyer, or any further consignment of goods without incurring any liability whatsoever to the purchaser. The Company reserves the right to charge the buyer interest on any amount overdue at the rate of $2 \%$ over the
standard Bank of England base rate current at the time the account becomes due.
10. NON-ASSIGNMENT. The contract or any party thereof shall not be assigned by the buyer without the written consent of the company.
11. LIQUIDATION. If the buyer shall make default in or commit any breach of any of his obligations to the Company or if any distress or execution shall be levied upon the buyer's property or assets or if the buyer shall make or offer to make any arrangements or composition with creditors or commit any act of bankruptcy or if any petition or receiving order in bankruptcy shall be presented or made against him or if the buyer shall be a limited company and any resolution or petition to wind up such company's undertaking, property or assets, or any part thereof, shall be appointed, the Company shall have the right forthwith to determine any contract and to cance any outstanding delivery or deliveries and to stop any goods in transit, but all without prejudice to any remedy which the Company may have in respect of the consequential non-complete or non-performance of the contract.
12. WARRANTY. All equipment complies with the high standards of quality established by the Company both in respect of materials and workmanship and as the sole and exclusive remedy in discharge of this warranty the Company undertakes to replace free of charge within 360 days from date of despatch from its works any components of its manufacture, which are proved to the satisfaction of the Company (whose decision shall be final and binding) to be defective in materials and workmanship provided notice in writing to the Company is given within 10 days of the defect occurring and provided the component which is the subject of the complaint, if the Company so requests returned pre-paid to the Company's works at Chester. In the case of defective components or parts not of the Company's manufacture the Company's liability shall be limited to such adjustment or allowance as the manufacturer there of shall make. The Company shall not accept responsibility for such work done or expense incurred by the buyer in connection with any repair or replacement unless the Company's prior
written authorisation has been obtained. This warranty is in lieu of and excludes all other conditions and warranties whatsoever whether expressed or implied and whether under common law, statute law or otherwise and apart from aforesaid the Company hereby expressly excludes all liability for any loss or damage whatsoever arising and howsoever caused. The buyer warrants that it will pass on, to all third parties to whom it may supply the goods, all information as to the use and safe handling of the goods, as may have been passed onto the buyer by the Company.
13. DESIGN AND MANUFACTURE. Where goods are made to the buyer's specifications, instructions or design, the buyer undertakes full responsibility for the suitability and accuracy of the specifications, instructions or design and undertakes to indemnify the Company for any loss, damage or expense in respect of any liability arising under the provisions of the Customer Protection Act 1987 in relation to the specification or design of such goods. The Company confirms all specifications within a quotation that is valid for 30 days from the date of quotation
14. LEGAL CONSTRUCTION. The contract shall in all respects be constructed and operate as a contract governed by English Law and unless otherwise agreed, is subject to the jurisdiction of the English Court. The legal construction of the clauses shall not be affected by their titles.

Forest Stewardship Council ${ }^{\circledR}$ is a global forest certification system established for forests and forest products, created to promote better forest management. Sustainable forest management practices allow the paper manufacturing sector to highlight their commitment to responsible sourcing. Certification allows chain of custody which ensures FSC ${ }^{\circledR}$ certified material is used.
More details can be found at the FSC web site www.fsc.org

[^1]:    *Additional heights of lift are sold as complete metres only.
    **UT Version is fitted as standard with chain claw (left). See page 204 for full details.

[^2]:    *Additional heights of lift are sold as complete metres only.

[^3]:    *Other chain containers are available on request.
    **Additional heights of lift are sold as complete metres only.

[^4]:    **Additional heights of lift are sold as complete metres only.

[^5]:    *Additional heights of lift are sold as complete metres only. **Ultra low headroom version (YLLHP/G) is also available. Prices on request.

[^6]:    *Prices shown are for range $A$. Range $B$ prices available on request.
    **Additional heights of lift are sold as complete metres only.

[^7]:    - All ropes are fused and tapered at one end. The other end terminates with eye hook in a heart shaped thimble secured by a mechanical splice.

[^8]:    - 2.5 metre hand chain drop is fitted as standard to the HTG trolleys to suit 3 metre HOL.
    - $£ 10.91$ per additional complete metre HOL (zinc plated hand chain) on standard finish HTG units.
    - £54.59 per additional complete metre HOL (stainless steel hand chain) on corrosion resistant HTG units.
    - Optional beam locking device available on request. Please contact the sales team for your quotation.
    - Locking nuts available on request - 500 kg N4300006187 £8.73, 1000kg N4300006188 £13.10, 2000 kg N4300006189 £26.20

[^9]:    *11 or 11/2.8 m/min travel speed available on request. - Low voltage control cow 2mtr, 2 button, pendant.
    ${ }^{* *}$ Prices shown are for range $A$ trolleys. Range $B$ prices are available on request.

[^10]:    * Above are based on a standard 3mtr HOL, with $2 m t r$ pendant.
    **Additional heights of lift are sold as complete metres only.
    - Load chain: 4 x 12mm. • Raincoat: (Article no. N4300013113), £126.66
    - Chain bags are NOT inc. as standard. See below for prices and size.

[^11]:    ジ
    spare parts for the CPS are shown on pages 186-187

[^12]:    212 spare parts for the CPV/F are shown on pages 164-180

[^13]:    ${ }^{1}$ Weight at standard lift (3 m). Other lifting heights on request.
    ${ }^{2}$ Additional weight for 2 speed version 2.0 kg
    ${ }^{3}$ Limit switches for highest and lowest hook positions

[^14]:    *In the upper layer. **With slipping clutch. • 110v option is NOT available. • Wall switch £322.09•Limit switch (up to 25 mtr) $£ 334.10$ Motor rating ED 40\%

    Please note that the prices shown above do NOT include ropes.

[^15]:    *Values for 6 bar (flow pressure) air consumption with rated load $4.7 \mathrm{~m}^{3} / \mathrm{min}$. CPA 100-2 : $9.4 \mathrm{~m}^{3} / \mathrm{min}$. **3mtr HOL
    -3/4 inch BSP air filter, regulator, and lubricator N4300006149 £776.30 • Above 10mtr HOL quick release valve N00850043 £225.11

    - Chain container to suit 10 mtr of chain $£ 77.52$ - Chain container to suit 20 mtr of chain $£ 93.90$
    - On geared travel trolley add additional $£ 10.91$ per mtr for hand chain on HOL.
    ***Additional heights of lift are sold as complete meters only.

[^16]:    Load indicator.
    Model TZL/TZR with hook.

[^17]:    -110v models are also available. Please call the Yale sales team for details. *Supplied with pendant control.

[^18]:    - Aluminium jacks with safety lock nuts (screwed rams) are also available. Please contact our sales team for further details.

[^19]:    * Price shown is for one skate.

[^20]:    PLEASE NOTE: Units are supplied as standard with a hook ring. *Per clamp. **Weight per clamp with hook ring.

[^21]:    Please contact our sales team for full technical drawings if required.
    *Per clamp.

[^22]:    **Maximum lifting capacity is achieved by using mild steels with the noted minimum thickness.
    Mild steel st37-Fe 360 to BS EN 100251990 (DIN 17100).

[^23]:    *Per clamp.

[^24]:    - Please advise rail section when ordering.

[^25]:    Please visit our resource library at: www.camlok.co.uk for operating manuals and technical data.

[^26]:    *recommended rope: DIN EN 12385-2 19x7 WC -B-sZ

[^27]:    *recommended rope: DIN 3069 SE 1960 N/mm²
    **recommended rope: DIN 3069 SE 1770 N/mm²

[^28]:    *Solid rubber (SR), Polyamide (PA), Polyurethane (PUR), Steel (ST)

[^29]:    *Solid rubber (SR), Polyamide (PA), Polyurethane (PUR), Steel (ST).

[^30]:    *Maximum. NB: Shipped on a EURO PALLET.

[^31]:    *Load case II according to Euler - the pressure force will be reduced with higher lift.

[^32]:    Only allow trained technicians to perform maintenance on CMCO products using genuine CMCO spare parts. Operating instructions and spare parts manual can be download from www.cmco.eu. For additional information please contact the sales team.
